

# Workshop on electromagnetic dipole moments of unstable particles

## venerdì 4 ottobre 2019

### New experimental techniques - Aula 113 (09:00 - 10:30)

-Coordinatori: Gianluca Cavoto

time	[id] title	presenter
09:00	[18] Amplitude analyses for MDM/EDM measurements	MARANGOTTO, Daniele
09:20	[19] Charm baryon production and polarization in fixed-target collisions	NIEL, Elisabeth
09:40	[20] Direct probe of tau dipole moments with bent crystals	FOMIN, Oleksiy
10:00	[21] Direct probe of tau dipole moments with bent crystals II	RUIZ VIDAL, Joan

### New experimental techniques - Aula 113 (11:00 - 12:30)

-Coordinatori: Gianluca Cavoto

time	[id] title	presenter
11:00	[23] Test and characterisation of bent crystal prototypes	SYTOV, Alexei SYTOV, Alexei
11:20	[24] Design, construction and test of bent crystals	ROMAGNONI, Marco
11:40	[25] Status-of-art LHC machine-crystal simulations	MIRARCHI, Daniele
12:00	[22] Round table discussion
