Q1	Corrosion Test A262 method E
XG	Heat Treatment

NDT Accredited for methods:

RT– PT– MT – UT	Volpiano site
RT – UT	Benevento site
RT – UT - MT	Several Embedded Unit Sites site

To Support the Production / Testing RAMP UP

- Analyze the Current Testing Needs (DT or NDT)
- Solutions:
 - A new Testing System/Equipment
 - Takeover of existing System to be revamped
 - A mixed solution
- Insertion of the Embedded Unit into the Bytest Quality System (9100, Nadcap, etc.) to reduce qualification times
- Other services:
 - Employees training and qualification by Bytest' certified inspector/Level III

These solutions will reduce drastically the testing timing
