NAPOLI STATUS

NAPOLI – SCoPE Site (the New supercomputing datacenter of University of Naples Federico II http://www.scope.unina.it)

The superbvo.org VO is currently configured and available on the 256 Core Xeon, anyway the superb application software/environment will be implemented in the next days.
The resources are available on the EGEE Grid through two Computing element:
- grisuce.scope.unina.it
- ce.scope.unina.it

INFN-NAPOLI-ATLAS TIER-2

We plan to configure the superbvo.org VO in the next days, after the installation of new hardware resources. We plan to share a range of 250-300 Jobs slot with fairshare policy.
