

# LOFAR SKP meeting

## Tuesday, 17 December 2019

**Active galaxies - ref. MORGANTI - Aula Magna Rettorato (14:00 - 15:55)**

time	[id] title	presenter
14:00	[60] A sample of remnant radio galaxies at 150 MHz from LoTSS	BRIENZA
14:20	[61] Blazars in LDR2	MOONEY
14:40	[62] Polarization statistics of bright radio galaxies at 150 MHz	MAHATMA
14:55	[63] Spectral index maps and modelling of the FR-I radio galaxy 3C 449	RICCI
15:10	[64] Life cycle of 3C293 with LOFAR	KUKRETI
15:25	[65] A glimpse into polarized emission from giant radio galaxies with LOFAR	STUARDI
15:40	[66] The cool-core cluster MS0735: spectral age study of the central AGN and cavities	BIAVA
