

# F2F Meeting CTA-INFN

## Monday, 18 November 2019

### Analysis and Simulation - P2A (15:00 - 16:20)

-Conveners: Francesco Longo; Alessio Berti

| time  | [id] title                                                                              | presenter                  |
|-------|-----------------------------------------------------------------------------------------|----------------------------|
| 15:00 | [20] MWL needs for CTA                                                                  | BARRES DE ALMEIDA, Ulisses |
| 15:10 | [9] Divergent Pointing                                                                  | DONINI, Alice              |
| 15:25 | [22] LST muon tagging                                                                   | Dr DI VENERE, Leonardo     |
| 15:35 | [15] LST data analysis                                                                  | LOPEZ COTO, Ruben          |
| 15:50 | [19] Convolutional Neural Network analysis for Imaging Atmospheric Cherenkov telescopes | LOPEZ COTO, Ruben          |
| 16:05 | [16] MAGIC and LST                                                                      | DI PIERRO, Federico        |
