Guidelines CYGNO PUBCOMM

20190730

20190905

20200326

1) Committee

The Authorship and Conference Committee (PubComm) is formed by ~~three~~ **four** members. They are elected by the Responsabili Locali (RL) and remain in charge for two years.

2) Authorship

CYGNO endorses maximal access to authorship, with particular attention to early career collaborators.

The list of Authors is compiled every six months **(by April 1st and October 1st)** by each Responsabile Locale (RL), and approved by all RL and the Responsabile Nazionale (RN).

Each Author must have a $\geq 20\%$ FTE in CYGNO or INITIUM.

PhD students can sign papers after one year since the beginning of PhD course.

Undergraduate students can sign the papers which contain results from their thesis.

The order of appearance on papers (both journal and proceedings) will be alphabetical, with indication of corresponding author(s).

3) Posting on repository

Posting preprint and postprint to arXiv or institutional repository is mandatory.

4) Revision process

A revision process is prepared for any article (journal or proceeding) with ≥ 2 **≥ 1 ?** reviewers appointed by the PubComm among collaboration members.

2020.03.26 CYGNO PubComm

5) Acknowledgement sentence

An acknowledgement sentence will appear in all articles/proceedings

6) Conferences

CYGNO endorses transparency and fairness in the choice of speakers.

Add: Personally invited talks on the CYGNO experiment will be endorsed by the RL and the RN, and listed in the talks database.

PubComm maintains a list of conferences, on a shared file, relevant to CYGNO for the next year, and keeps it updated should new conferences appear.

Potential speakers can be nominated or be self-nominated.

Preparing conference proceedings is mandatory.

Posting preprint and postprint of proceeding papers to arXiv or institutional repository is mandatory.

The shared file will record nominations and actual speaker.

A scoring system (larger weight for more important talks) will be attributed for statistical purpose only.

A repository will store approved results.

Only approved results can be shown publicly.

Approval of results is asked by author after presentation at a CYGNO meeting.

Talks/posters must be distributed to the collaboration at least seven days prior to submission/presentation.

Colour choice on plots must follow guidelines for colorblindness (i.e., <https://webaim.org/articles/visual/colorblind>)

PubComm will prepare a repository, each containing conferences, workshops, talks etc given in half year.

For approval

- PubComm from three to four members
- Giovanni Maccarrone joins PubComm
- Invited talks
