

Meeting 29Dec2019

T. Asada

Plan for LNGS Activities

- Cleaning of the room
 - test run with water and dust check of production machine
 - Test production of 70nm NIT
-
- 12/2 update
 - Construction is still ongoing(outside the facility for waste tank and electricity etc.)
 - Production and development is impossible on Dec

Data Analysis

- FAN127gf (70nm, Ag rich batch aiming fog reduction)
- 100 keV Carbon, gamma, reference are scanned
- Japanese event matching system is installed to Asada PC. Under test of matching.
 - Calculation of Reduction power using brightness cut like FAN123gf reported in the collaboration meeting
