Glimpse of B_K on the ultrafine ($a = 0.045$ fm) lattices

Tuesday, 15 June 2010 18:00 (5 minutes)

We report our first experience with the analysis of B_K calculated on the MILC ultrafine lattices using improved staggered fermions. The results are preliminary. However, since it is so close to the continuum, the prematurity does not desecrate the bright splendor of the results much.
