

# Lattice2010

## Tuesday, 15 June 2010

### Parallel 35: Theoretical developments - Room6 (14:30 - 16:10)

time	[id] title	presenter
14:30	[95] Near-Integrability of Yang-Mills Theories	ORLAND, Peter
14:50	[109] Very high order lattice perturbation theory for Wilson loops	PERLT, Holger
15:10	[121] Glueball masses with exponentially improved statistical precision	DELLA MORTE, Michele
15:30	[204] 5-dimensional SU(2) lattice gauge theory with $Z_2$ orbifolding and its phase structure	SO, Hiroto
15:50	[217] Second Order Phase Transition in Anisotropic Lattice Gauge Theories with Extra Dimensions	NICOLIS, Stam
