

POSTPONED- First mini-workshop DAFNE-Light 2020 - Halogenated Perovskites: a New Material for Solar Cell Devices and Innovative Detectors

Contribution ID: 1

Type: **not specified**

Halogenated perovskites: a new material with semiconducting and ionic behavior.

Thursday, 19 March 2020 10:30 (30 minutes)

Presenter: Prof. DI CARLO, Aldo (C.H.O.S.E. - University of Rome Tor Vergata)
