Study on properties of AISI 316L produced by Laser Powder Bed Fusion for high energy physics applications

Thursday, 26 May 2022 15:35 (1 minute)

Nowadays additive manufacturing is catching on and spreading across various fields at an astonishing rate. High energy physics, where materials are often exposed to special environmental conditions, is also starting to use this technology. The aim of this paper is to compare traditional and 3D printed stainless steel AISI 316L products with an eye turned to the specific high energy applications. The manufactured samples are subjected to different heat treatments, including vacuum firing, which is usually adopted for ultra-vacuum applications. Experimental tests are carried out on a set of samples to analyse the material composition and to assess properties such as mechanical performance in cryogenic application, high radiation resistance and ultra-vacuum compatibility. Such analysis of the material behaviour allows weakness and strength of the technology to be identified, compared to traditional AISI 316L.

Collaboration

Primary authors: ROSSI, Cecilia (Istituto Nazionale di Fisica Nucleare); Dr BUATIER DE MONGEOT, Francesco (Dipartimento di Fisica, Università degli Studi di Genova, via Dodecaneso 33, 16146 Genoa, Italy); Dr FERRANDO, Giulio (Dipartimento di Fisica, Università degli Studi di Genova, via Dodecaneso 33, 16146 Genoa, Italy); Dr MANZATO, Giacomo (Dipartimento di Fisica, Università degli Studi di Genova, via Dodecaneso 33, 16146 Genoa, Italy); Mr MEYER, Mickael (CERN, 1211 Geneva 23, Switzerland); PARODI, Luigi (Istituto Nazionale di Fisica Nucleare); Dr SGOBBA, Stefano (CERN, 1211 Geneva 23, Switzerland); Dr SORTINO, Marco (Dipartimento Politecnico di Ingegneria e Architettura, Università degli Studi di Udine, via delle Scienze 206, 33100 Udine, Italy); Dr VAGLIO, Emanuele (Dipartimento Politecnico di Ingegneria e Architettura, Università degli Studi di Udine, via delle Scienze 206, 33100 Udine, Italy)

Presenter: ROSSI, Cecilia (Istituto Nazionale di Fisica Nucleare)

Session Classification: Detectors Techniques for Cosmology and Astroparticle Physics - Poster session
