

IDROGENO SOLIDO AD ALTA PRESSIONE ($\sim Mbar$)

FIG. 13. Pressure dependences of the Raman and infrared vibron frequencies [$Q_1(J)_{\text{Raman}}$] and [$Q_1(J)_{\text{IR}}$] showing the I-II and II-III phase transitions. The 295-K data (Phase I) are given by the dashed curves (Hanfland *et al.*, 1993).
