XIX International Workshop on Neutrino Telescopes

Flavio Seno

A long history

Giovanni Poleni (1739)
1° Chair of Experimental Philosophy

New building

Bruno Rossi (1905-1993)

Contribution to the birth of multimessenger astronomy (astrophysics neutrino and Cherenkov telescopes)

Milla Baldo Ceolin (1924-2011)
Marcello Cresti (1928-2020)

Department of Physics

Department of Astronomy

(founded 1964)

01.01.2012

Department of Physics and Astronomy (DFA)

- 138 Faculty members
- 73 Administrative and technical staff
- 70 Postdocs
- 112 Ph.d. students

Very strong synergy with INFN and INAF

Teaching

Bachelor

Astronomia
Fisica
Ottica e Optometria

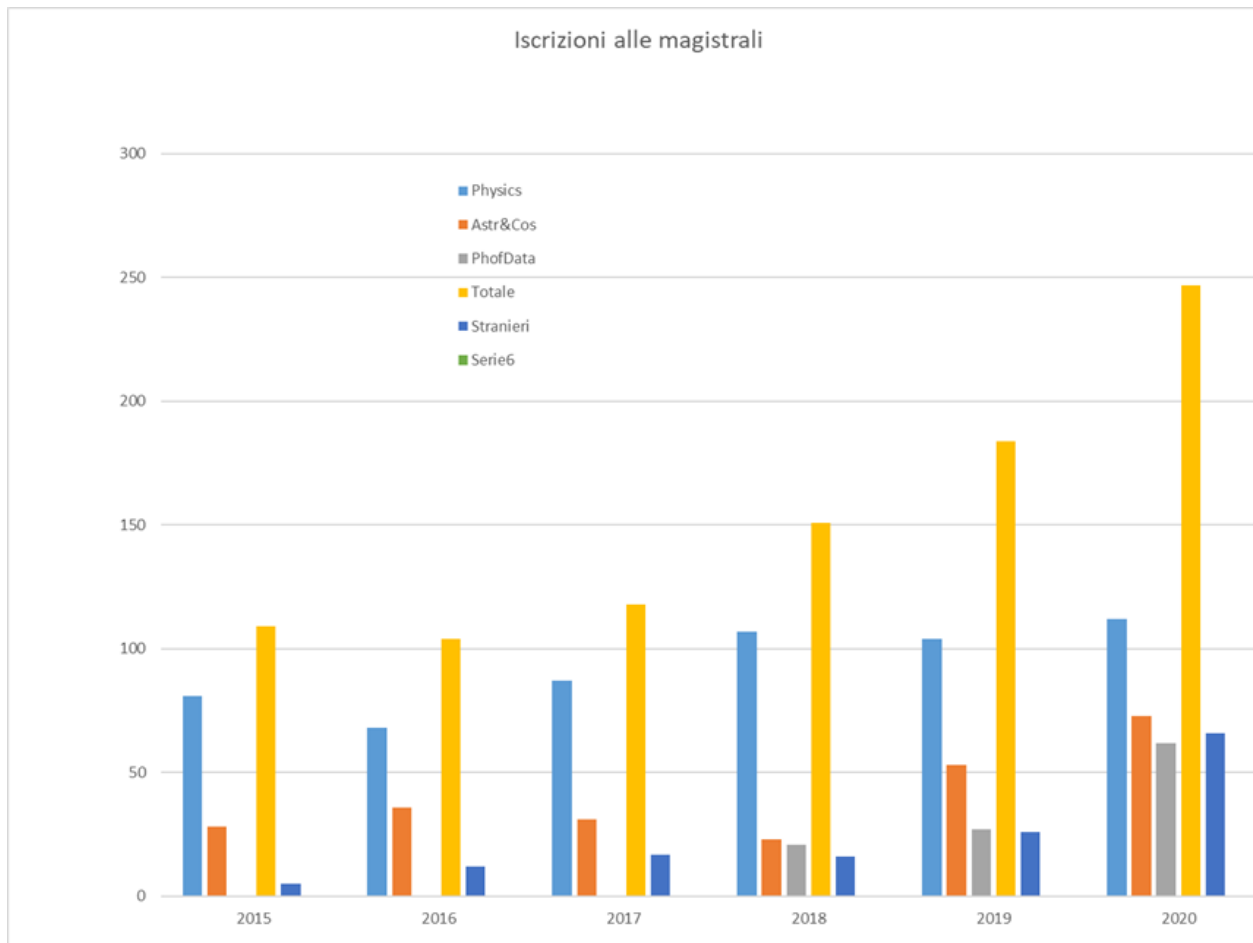

Master

Astrophysics and Cosmology
Physics
Physics of Data

Ph. D.

Astronomia
Physics
Scienza dei Materiali

Number of foreign student is increasing

“The meeting closed with the hope of organising a Neutrino Telescopes II in Venice next November.”

[thanking Leopolda Benazzato]: “her role in making “Neutrino Telescopes” successful cannot be overstated.”

[From the Introduction signed by Milla]
