

Short Term Plans: Produce physics studies to contribute to Snowmass

- Presented LOI
 - a) Study of methods for the luminosity measurement
 - b) Study of Higgs couplings and self-couplings precision
 - c) Solidifying the physics case: evaluate the object reconstruction performance for different $\sqrt{s}$
 - d)

- Characterize Beam-Induced Background at $\sqrt{s} = 3$ TeV
- Meetings every two weeks on Tuesday at 4pm using the mailing list muon_collider_studies@lists.infn.it
