Search for Lepton-Flavor-Violating tau decays at the B factories

giovedì 14 ottobre 2010 10:30 (25 minuti)

Both the B-factories BaBar and Belle have ended data taking and have mostly completed the data analysis aimed at searching Lepton Flavor Violation in tau decays. No evidence of LFV has been found yet. We review in the following the experimental upper limits that have been set.

Autore principale: LUSIANI, Alberto (INFN Pisa)

Relatore: LUSIANI, Alberto (INFN Pisa)

Classifica Sessioni: Lepton Flavor Violation

Classificazione della track: LF Violation
