Status and prospects for the Ke2/Kmu2 at KLOE/KLOE2

Tuesday, 12 October 2010 14:30 (25 minutes)

I would propose to present and discuss at HQL10 about the prospects for improving the constraints on lepton-flavor violation in MSSM with the KLOE-2 experiment. KLOE has recently published the analysis on the Ke2 decays:
<http://dx.doi.org/10.1140/epjc/10052-009-1177.x>
and the KLOE-2 physics programme has been published on <http://dx.doi.org/10.1140/epjc/10052-010-1351.1>
