

Dipingere con la luce

Felicita Russo

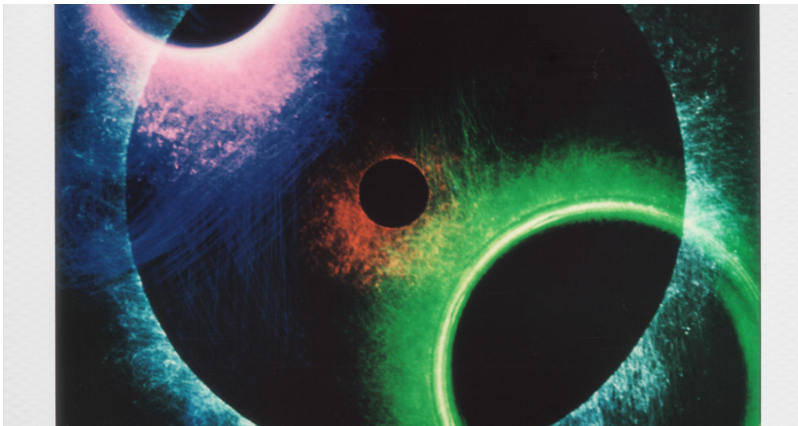

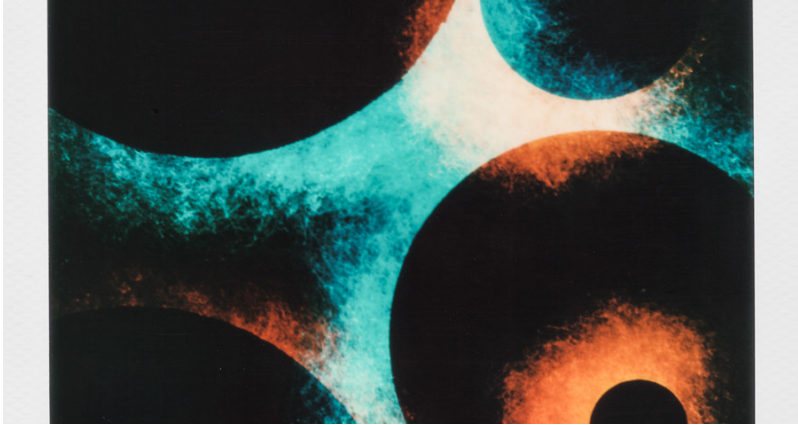

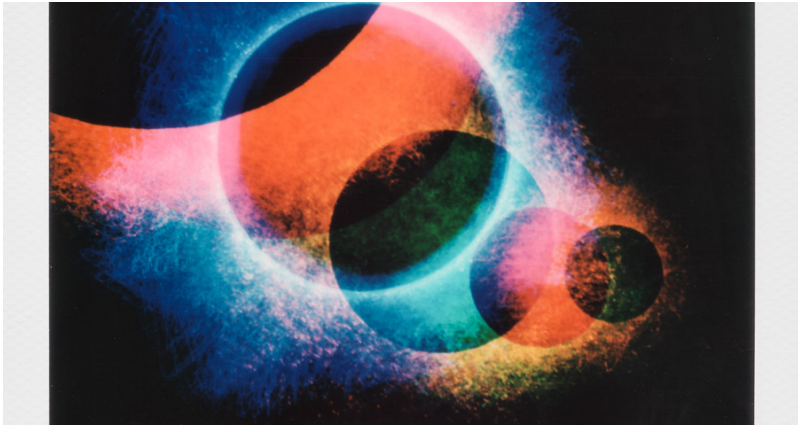

Polaroid

La storia della Polaroid ha inizio nel 1937 quando Edwin H. Land fonda la **Polaroid Corporation**.

La vera e propria svolta, però, arrivò nel 1947 quando Land si trovava in vacanza con la figlia di 3 anni, Jennifer; Land scattò una foto alla figlia la quale chiese al padre perché non potesse vedere subito la foto scattata.

Il risultato, dopo un anno di ricerche, fu la **Polaroid 95** (1948), la prima macchina fotografica istantanea della storia.
