## Carbon stars in the L-band: update on ongoing work

*Wednesday, 22 June 2022 14:30 (5 minutes)*

We report on ongoing projects related to observations of prominent Carbon stars in the L-band. This wavelength region is of particular interest as it covers a strong band of  $C_2H_2$  a building block of Carbon dust. The instruments used are MATISSE at the VLT Interferometer and ALES at LBTI.

### Session

Stellar observations (photometry and spectrometry)

**Primary authors:** HRON, Josef (Dept. of Astrophysics, University of Vienna); MATISSE TEAM; PALADINI, Claudia (ESO); STONE, Jordan (LBTI); ERTEL, Steve; MARIGO, Paola (Department of Physics and Astronomy, University of Padova)

**Presenter:** HRON, Josef (Dept. of Astrophysics, University of Vienna)

**Session Classification:** Poster presentation
