List of new results

| Material | Status | Comments |
|--|----------------------------|---------------------------------|
| Neutron yields for the (α ,n) reactions (using SaG4n and NeuCBOT) | | |
| Rigid barrier | done | Composition: Elemental analysis |
| Reinforced PU foam | done | Composition: Elemental analysis |
| Solder InAgAr | done | |
| Siltem pellets | mostly done, not processed | It will be ready tomorrow |
| Pure Ti | mostly done, not processed | It will be ready tomorrow |
| Chip ATTiny102 | mostly done, not processed | It will be ready tomorrow |
| Chip sot23 | mostly done, not processed | It will be ready tomorrow |
| FC resistor | mostly done, not processed | It will be ready tomorrow |
| Si | mostly done, not processed | It will be ready tomorrow |
