

ECOGAS shift week 10-11

G. Rigoletti

EP-DT
Detector Technologies

11/03/21

- Started stability run:

GT and EPDT to 10600 V

Kodel set to 8100 V

- Regulated humidity 5 °C -> 4 °C
- Rate scan in the evening by Mapse and Nicolas

12/03/21

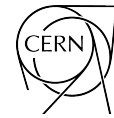

EP-DT
Detector Technologies

- Rate scan performed by Mapse and Nicolas
- Nothing in particular to report
- ABS 4.6 until 17/03

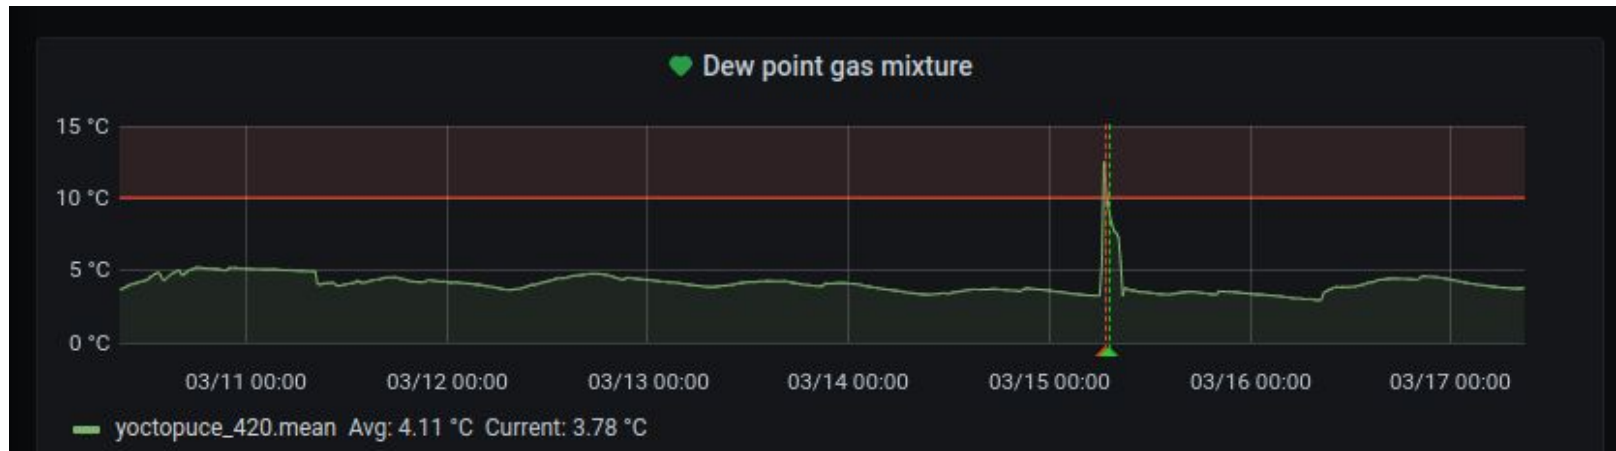

•

12/03/21

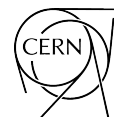

EP-DT
Detector Technologies

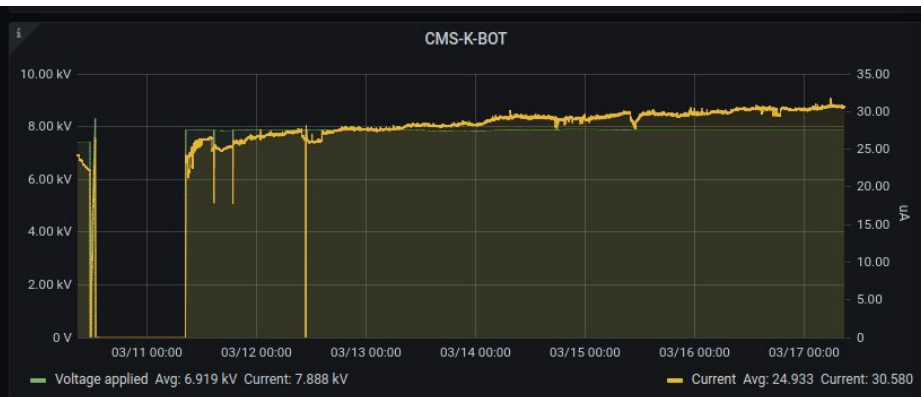

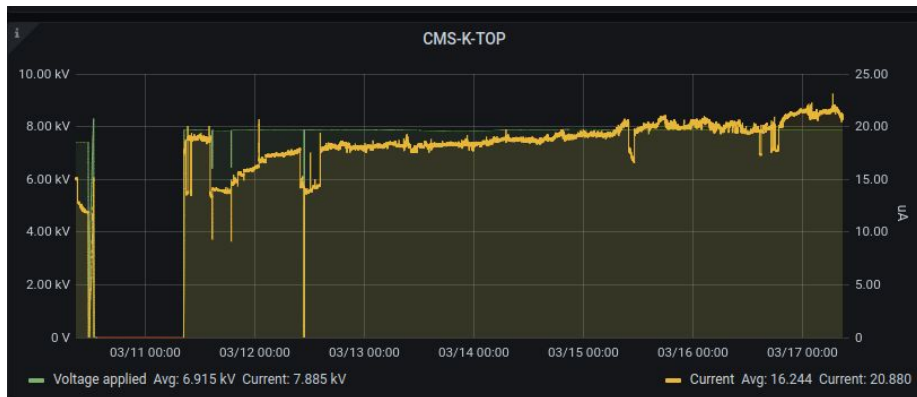

- Rate scan performed by Mapse and Nicolas
- Nothing in particular to report
- ABS 4.6 until 17/03
- Usual spike in the humidity -> no change in the currents

week overview

- It seems there is a current drift with KODEL chambers of 3-5 μA

week overview

- GT and EPDT chambers look stable
