

Shift summary

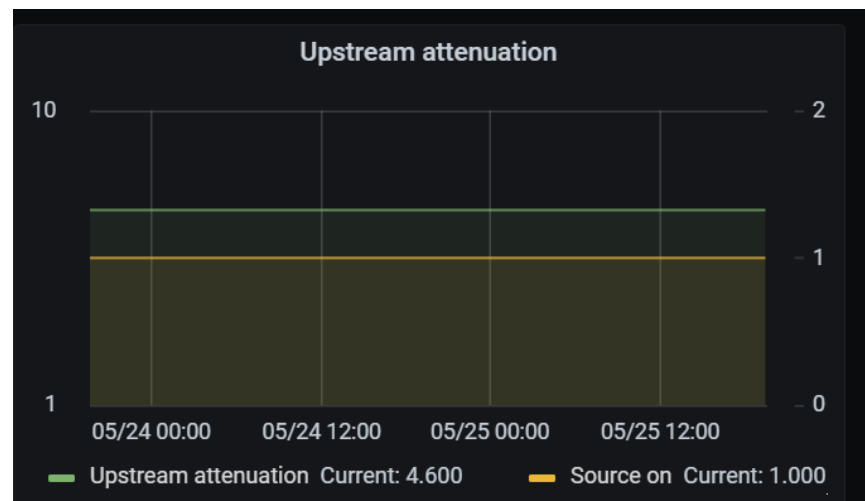

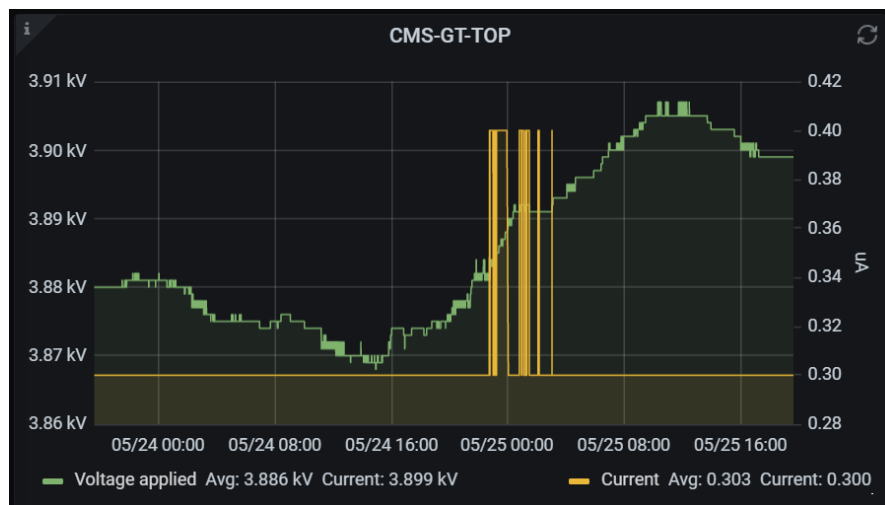

20-26/05

Liliana Congedo and Alessandra Pastore

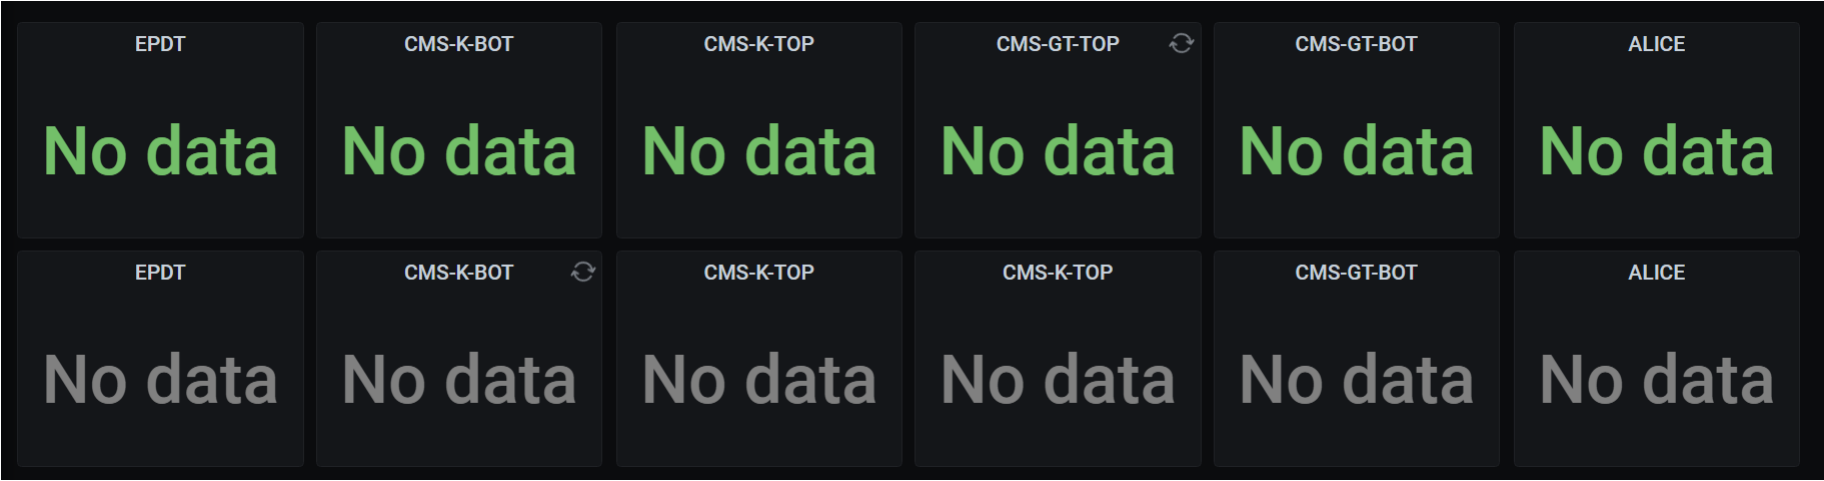

Stability run for CMS-GT chambers with standard gas mixture:
No unusual issue has been observed during the week

Currents variation of ~ 0.1 uA observed for both chambers while source status stable

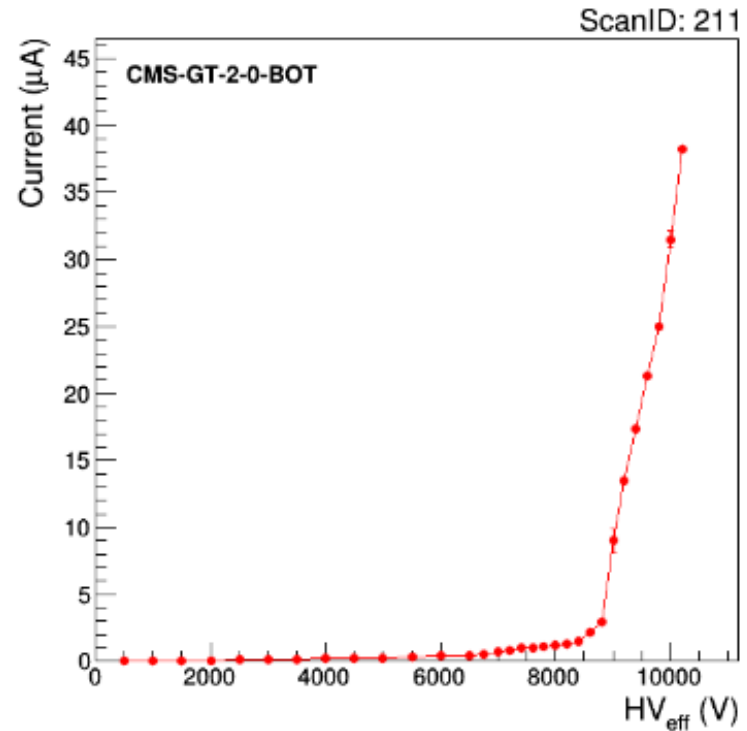

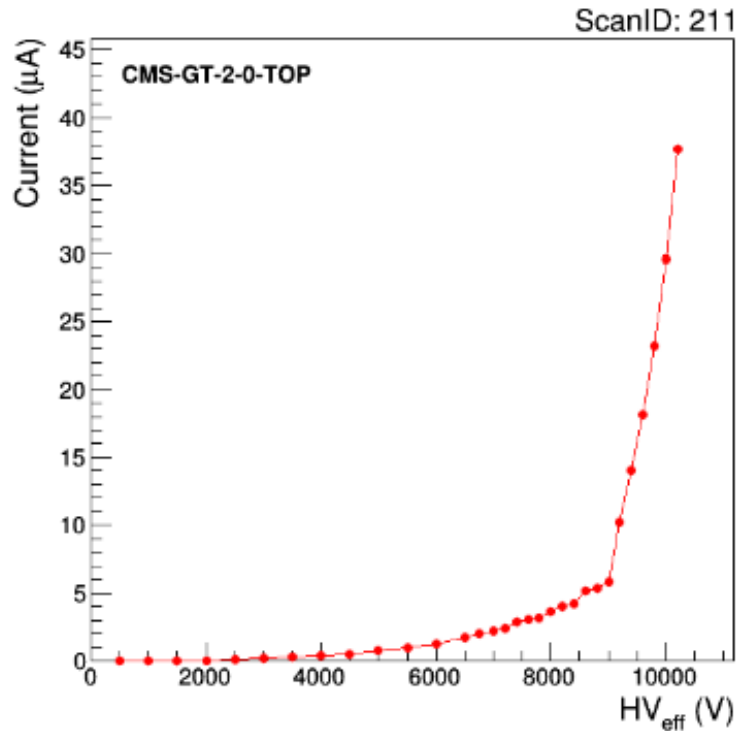

Today, Grafana dashboard:

To be fixed

Results of current scan performed by Amrutha on 19/05
(source: ON, 4.6 – standard mix)

Now the source is OFF and an HV scan could be performed if everyone agrees.
