

The logo for INFN PISA is displayed on the left side of the slide. It features the letters 'N' and 'F' in a dark blue color, and the letters 'F' and 'PISA' in a light blue color. The letters are bold and sans-serif. The logo is partially enclosed by a white circular arc that overlaps the background image.

INFN
PISA

The background of the slide is a photograph of a server room. The room is filled with rows of server racks, and the floor is covered with a dark, textured mat. The lighting is dim, creating a professional and technical atmosphere.

Centro di calcolo Scientifico INFN Pisa

- *100 m²*
- *550 KW (400 + 150)*
- *Oltre 700 nodi di calcolo*
- *Oltre 15.000 core in produzione*
- *4.5 PB storage*
- *WAN a 20 Gbps*

1998

HTC

High Throughput Computing

- Computing di tipo GRID, «seriale»
- Affrontare tanti problemi mediamente complessi

As of March 2020

HPC

High Performance Computing

- Computing parallelo
- Affrontare un singolo problema estremamente complesso

e inoltre...

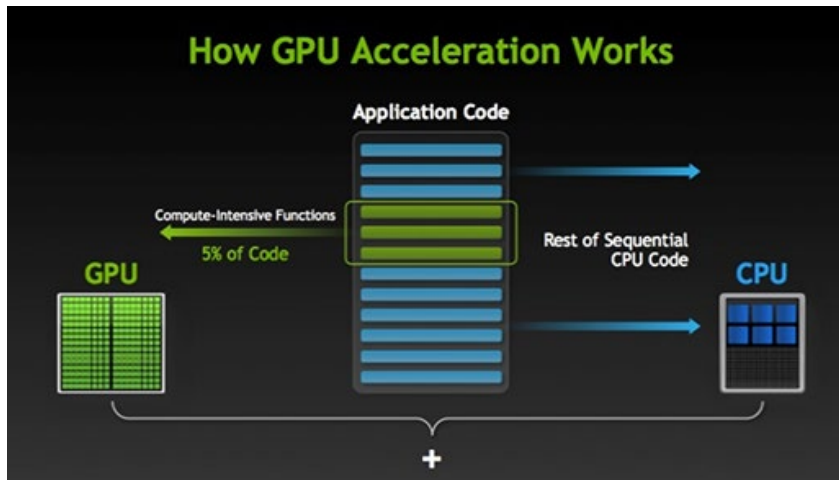

- macchine con coprocessori NVIDIA

Anche in combinazione con

- Macchine alta memoria (fisica teorica)

NVIDIA

The IBM logo, consisting of the letters 'IBM' in a blue, striped font.

Power AI

Senza dimenticare...

- Altro calcolo di tipo «scientifico»:
- calcolo di tipo interattivo o pseudo-interattivo
- visualizzazione remota
- calcolo ingegneristico (elettronico/meccanico)

parallelo

HPC 10.000 core (circa)

Organizzati in cluster

Un po' di storia...

Il cluster «Tramontana»: 3 vite!

2010-2012

parallelo su GRID
Cluster: parallelo HPC

1024 core - 1200 core
InfiniBand DDR 20 Gbps

Fluidodinamica computazionale (CFD)
ACCORDO SCIENTIFICO «CUBIT»

2018

Il nuovo «TRAMONTANA» 9000 core
InfiniBand QDR 40 Gbps

Il cluster «Zefiro»: 2 vite!

2013-2017

Il progetto premiale SUMA & cluster nazionale fisica teorica
Accesso via INFN-AAI per tutto l' INFN

2019

Collaborazione «EUCLID»

Server 4p
2048 core – IB QDR 40 Gbps

Accordo Scientifico con CUBIT

Nasce dalla pluriennale
esperienza con DICI UNIP
sezione Aerospaziale (2002)

INFN e CUBIT collaborano, ciascuna nell'ambito delle proprie competenze, nello svolgere attività di ricerca congiunta finalizzata allo sviluppo e gestione di sistemi per HPC (high performance computing).

INFN e CUBIT fanno uso del medesimo strumento computazionale: il calcolo parallelo di tipo HPC. L'INFN usa il calcolo HPC principalmente per gli studi di Fisica Teorica. Il team di CUBIT dedicato alla aerodinamica usa il Calcolo HPC per lo studio e l'utilizzo della CFD.

Collaborazione con UIUC & AAR
