Kaon Physics and discrete symmetries: status and perspectives

Monday, 6 December 2010 12:45 (45 minutes)

The status of tests for discrete symmetries and their link with flavour physics within the kaon system will be reviewed. A new renaissance of activity in the field comprises both experiments in an advanced stage of preparation and future projects with ambitious goals: they will be discussed with an eye towards the future prospects and assessments.

Presenter: Prof. SOZZI, Marco (University of Pisa)

Session Classification: Plenary Session 2
