

9th GOSPEL Workshop. Gas sensors based on semiconducting metal oxides:
novel materials & mechanism analyses & application fields

Contribution ID: 203

Type: **Invited talk**

**In vivo producing handheld gas sensor detectable
breath marker: The future of induced volatolomics in
cancer risk pre-warning**

Monday, 5 August 2024 11:10 (15 minutes)

Presenter: HAN, Jin (School of Sensing Science and Engineering, Shanghai Jiao Tong University, China)
