

Low activity Radon emanation sources for greenhouse gas mitigation strategy

Monika Mazánová¹, Stefan Röttger², Florian Mertes², Annette Röttger², Petr Otáhal³

1 Czech Metrology Institute (CMI), 2 *Physikalisch-Technische Bundesanstalt (PTB)*,
3 *National Institute for Nuclear, Chemical and Biological Protection (SUJCHBO)*

- EMPIR project 16ENV10 MetroRADON
- Development of two new traceable low-level ^{222}Rn emanating sources
 - below $100 \text{ Bq}\cdot\text{m}^{-3}$
 - PTB source
 - CMI source
- Transfer instrument calibration, calibration procedure
- Outdoor low-level radon activity concentrations in range $1 \text{ Bq}\cdot\text{m}^{-3}$ to $100 \text{ Bq}\cdot\text{m}^{-3}$
