## Conclusions from the 2021 Snowmass Process

*Friday, 23 September 2022 11:50 (30 minutes)*

The U.S. Particle Physics Community Planning Exercise, ‘Snowmass 2021’ was completed in July 2022 and provides input for the Particle Physics Project Prioritization Panel (P5), which will develop a ~10 year scientific vision for the future of the U.S. high energy physics program. In this contribution we provide a general overview of the Snowmass 2021 conclusions and discuss the outcomes relevant for the Advanced Accelerator Community and the advanced collider concepts, which aim to reduce the dimensions, CO<sub>2</sub> footprint and costs of future high energy physics machines.
