

SM&FT 2022 - The XIX Workshop on Statistical Mechanics and nonperturbative Field Theory

Tuesday, 20 December 2022

Session 7 - Dipartimento di Fisica - Università di Bari "Aldo Moro" - aula A ("Giuseppe Nardulli") - 1st floor (15:00 - 17:05)

-Conveners: Michele Pepe

time	[id] title	presenter
15:00	[127] The Exodus to GPU. The case of scientific analysis for the Euclid mission.	RENZI, Alessandro
15:25	[66] Understanding the non-Gaussianities in the Hubble-Lemaitre diagram	FANIZZA, Giuseppe
15:45	[72] A new first-order formulation of the Einstein equations exploiting analogies with electrodynamics	GUERCILENA, Federico Maria
16:05	[105] Lindblad master equation approach to the topological phase transition in the disordered Su-Schrieffer-Heeger model	NAVA, Andrea
16:25	[90] Stochastic normalizing flows as non-equilibrium transformations	Dr NADA, Alessandro
16:45	[85] Entanglement entropy from non-equilibrium lattice simulations	BULGARELLI, Andrea
