

SM&FT 2022 - The XIX Workshop on Statistical Mechanics and nonperturbative Field Theory

Tuesday, 20 December 2022

Session 8 B - Dipartimento di Fisica - Università di Bari "Aldo Moro" - aula B - 1st floor (17:35 - 19:35)

-Conveners: Domenico Pomarico

| time | [id] title | presenter |
|-------|---|----------------------------|
| 17:35 | [80] Morphology and dynamics of phase separation in two-dimensional active systems | CAPORUSSO, Claudio Basilio |
| 17:55 | [83] Thermalization with a multibath: an investigation in simple models | CAROLLO, Giovanni Battista |
| 18:15 | [121] Fluctuations of arctic curves and the Tracy Widom distribution | VITI, Jacopo |
| 18:35 | [114] From smeared spectral functions to the lattice calculation of inclusive semileptonic decays | Mr SMECCA, Antonio |
| 18:55 | [131] Mixing of a Buoyant Jet in a Crossflow with the Lattice Boltzmann Method | Ms GIORDANO, Maria Grazia |
| 19:15 | [134] tba | |
