EFT interpretations in top quark events in CMS

Thursday, 7 July 2022 15:50 (15 minutes)

Top quark production can probe physics beyond the SM in different ways. The Effective Field Theory (EFT) framework allows searching for beyond the SM effects in a model independent way. The CMS experiment is pioneering EFT measurements that move towards using the full potential of the data in the most global way possible.

In-person participation

Yes

Primary author: GOLDOUZIAN, Reza (University of Notre Dame (US))

Co-author: MEYER, Arnd

Presenter: GOLDOUZIAN, Reza (University of Notre Dame (US))

Session Classification: Top quark and EW Physics

Track Classification: Top quark and EW Physics
