Amplitude analyses of charm decays at LHCb

Saturday, 9 July 2022 12:20 (15 minutes)

LHCb has recorded the largest sample of charm hadrons during Run 1 and Run 2 of the LHC (2011–2018). With these data, amplitude analyses of samples of unprecedented size are possible. Recent results of charm hadrons decays are shown.

In-person participation

Yes

Primary author: NEUBERT, Sebastian (Bonn University)

Presenter: GONCALVES ABRANTES, Fernanda (University of Oxford)

Session Classification: Strong interactions and Hadron Physics

Track Classification: Strong interactions and Hadron Physics
