The muon collider progress

Friday, 8 July 2022 10:20 (20 minutes)

Recently the muon collider has been recognised as an important option to be considered for the future of particle physics.

It is part of the European Accelerator R&D Roadmap developed in 2021 and approved by Council. Also interest is rising in the Americas and in Asia, for example demonstrated by the ongoing Snowmass process.

The presentation will give an introduction into the muon collider concept and the identified challenges. It will also describe the R&D progress and plans.

In-person participation

No

Primary author: SCHULTE, Daniel

Presenter: SCHULTE, Daniel

Session Classification: Accelerators: Physics, Performance, and R&D for future facilities

Track Classification: Accelerators: Physics, Performance and R&D for future facilities
