## Outreach activities for KEK 50th anniversary

*Saturday, 9 July 2022 10:15 (15 minutes)*

High Energy Accelerator Research Organization (KEK) was founded in 1971 and celebrated its 50th anniversary in 2021. Due to the novel coronavirus pandemic, it has been very difficult to conduct in-person outreach activities as we had envisioned, but we have responded by moving some of our programs online.

In this talk, I would like to report on some of the innovations and difficulties we faced in bringing our public outreach online, as well as the results of our hybrid 50th anniversary symposium.

### In-person participation

Yes
