Measurements of the CKM angle γ at LHCb

Thursday, 7 July 2022 09:34 (17 minutes)

The tree-level determination of the CKM angle γ is a standard candle measurement of CP violation in the Standard Model. The latest LHCb results from measurements of CP violation using beauty to open charm decays are presented. These include measurements using the full LHCb Run 1+2 data sample and the latest LHCb γ & charm mixing combination.

In-person participation

Yes
