## Searches for supersymmetry in hadronic and photonic final states with the CMS experiment

*Friday, 8 July 2022 11:15 (15 minutes)*

The latest results of searches for supersymmetry in hadronic and photonic final states with the CMS experiment will be presented. The analyses are based on the full dataset of proton-proton collisions collected during the Run 2 of the LHC at a center-of-mass energy of 13 TeV.

### In-person participation
