

ATLAS Virtual Visits

Bringing the world to our detector

Visits give the opportunity to groups from all over the world to explore CERN and the experiment through a **live video link**.

GROUP VIRTUAL VISITS

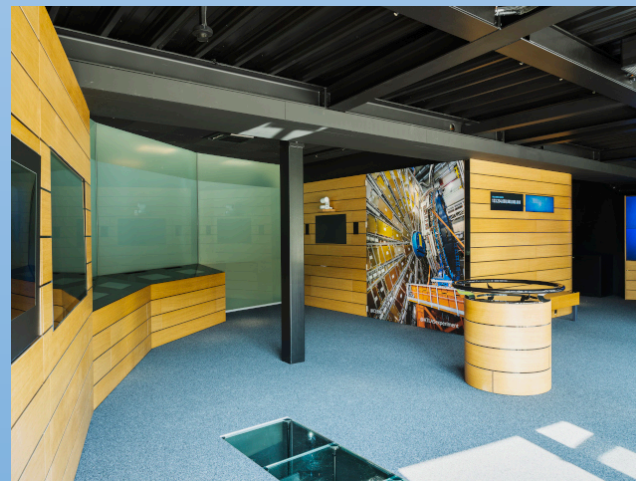

A group virtual visit can be booked by any group: e.g., schools (science and non-science classes) and universities (undergraduate and graduate students).

The visit is managed by scientists working in the experiment, who introduce themselves, present CERN, LHC and ATLAS experiment and invite questions from the audience.

When the **cavern** is open, guides can go inside and virtually show the audience inside.

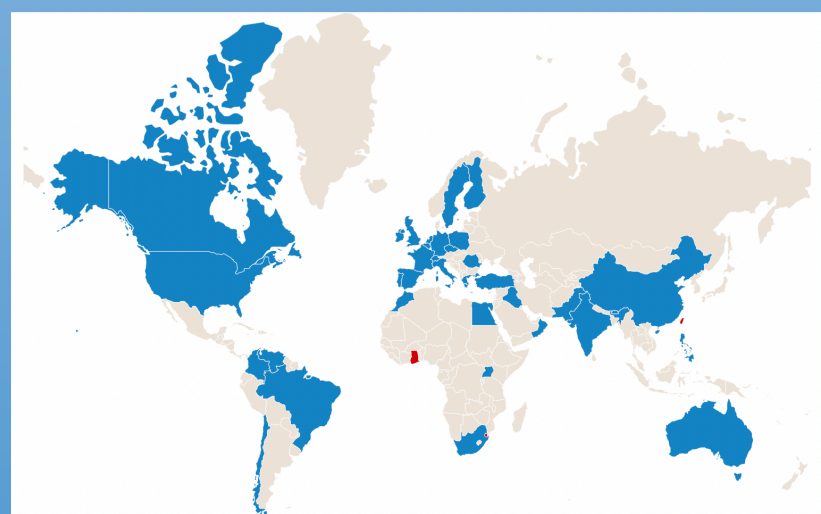

During **Run 3**, while the cavern is closed, visits will take place in the **new ATLAS Visitor Center**. This is an integrated camera system which enables virtual and in-person visits at the same time.

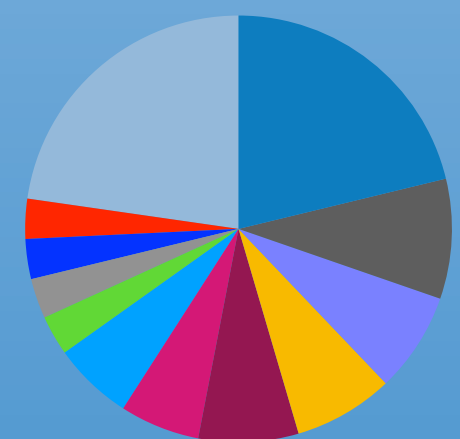

People from **all over the world** booked visits in 2022.

Number of visits	66
Number of countries	26
Number of new countries	3
Number of languages	6

Data until 24 June 2022

The 26 countries which booked the visit. In red are the new visitor year:
Ghana, Swaziland and Taiwan

2022

OPEN VIRTUAL VISITS

- **Open** virtual visits are also organised monthly.
- Live stream to TikTok and YouTube.
- Last virtual visit before Run3 on **23th March** in the cavern.
