## Unique Properties of Primary Cosmic Rays: Results from the Alpha Magnetic Spectrometer

*Thursday, 7 July 2022 17:00 (15 minutes)*

We present high statistics measurements of primary cosmic rays Helium, Carbon, Oxygen, Neon, Magnesium, Silicon, Sulfur, Iron, and Nickel with AMS. The properties of He-C-O, Ne-Mg-Si, S, Fe and Ni fluxes are discussed.

### In-person participation

Yes
