## Recent results on single top productions in CMS

*Friday, 8 July 2022 20:10 (20 minutes)*

Latest results on inclusive and differential single top quark production cross sections are presented using the data collected by CMS. The single top quark analyses investigate separately the production of top quarks via t-channel exchange, via the associated production with a W boson (tW), and via the s-channel.

### In-person participation

Yes
