Light Meson Spectroscopy at BESIII

Saturday, 9 July 2022 18:00 (15 minutes)

BESIII has the world's largest samples of J/ψ and $\psi(3686)$ events from e^+e^- annihilations, which offer an ideal and clean laboratory to study light meson spectroscopy, in particular for the search for QCD exotics. Recent important achievements in this field, including the observation of a 1^- state, $\eta_1(1855)$ in $J/\psi \rightarrow \gamma\eta\eta'$, the observation of the $X(2600)$ in $J/\psi \rightarrow \gamma\eta'\pi^+\pi^-$, and the PWA of $J/\psi \rightarrow \gamma\eta'\eta'$ will be highlighted.

In-person participation

No

Primary authors: LIU, Beijiang (Institute of High Energy Physics); BIANCHI, Fabrizio (Istituto Nazionale di Fisica Nucleare); HOU, guoyi (The Institute of High Energy Physics (IHEP), Chinese Academy of Sciences (CAS))

Presenter: HOU, guoyi (The Institute of High Energy Physics (IHEP), Chinese Academy of Sciences (CAS))

Session Classification: Strong interactions and Hadron Physics

Track Classification: Strong interactions and Hadron Physics
