

From Planck to the future of CMB

Contribution ID: 116

Type: **not specified**

Invited talk by Charles R. Lawrence (NASA/JPL) on "Lessons from Planck Calibration for Future CMB Experiments"

Tuesday, 24 May 2022 09:00 (40 minutes)

Planck set new standards for calibration of CMB experiments. That was hard. Calibration of future experiments, which will require map noise levels of nanokelvin or better, will be much harder. I will discuss lessons learned in calibrating Planck for future experiments.
