Pre-BNCT MRI and BPA-PET

Contrast-enhanced T1-weighted MRI of representative glioblastoma patient and 18 F-labeled BPA-PET image after initial debulking surgery.

RF Barth et al, 2012

RESEARCH

Speed up database creation
to improve TPS

HEAD & NECK CANCER

Wang LW, Liu YH, Chou FI, Jiang SH. Clinical trials for treating recurrent head and neck cancer with boron neutron capture therapy using the Tsing-Hua Open Pool Reactor. *Cancer Commun (Lond)*. 2018 Jun 19;38(1):37. doi: 10.1186/s40880-018-0295-y. PMID: 29914577; PMCID: PMC6006853.

GLIOBLASTOMA MULTIFORME

Kawabata S, Suzuki M, Hirose K, et al. Accelerator-based BNCT for patients with recurrent glioblastoma: a multicenter phase II study. *Neurooncol Adv*. 2021;3(1):vdab067. Published 2021 May 20. doi:10.1093/noajnl/vdab067

DATABASE

HEAD & NECK CANCER

GLIOBLASTOMA MULTIFORME

**MRI and CT images
of both cancer types are available on open access databases**

**Taipei Veterans General
Hospital has agreed to
share their anonymized
BNCT patients images
In particular for H&N
cancer**

Trial in progress

**For both cancer types the chosen database need to be
STANDARDIZED
and TRAINING and TESTING group of images will be created**

SEGMENTATION ALGORITHM

DEEP NEURAL NETWORK

will be used to segment the images for both image modalities and both cancer types

MRI
segmentation
algorithm

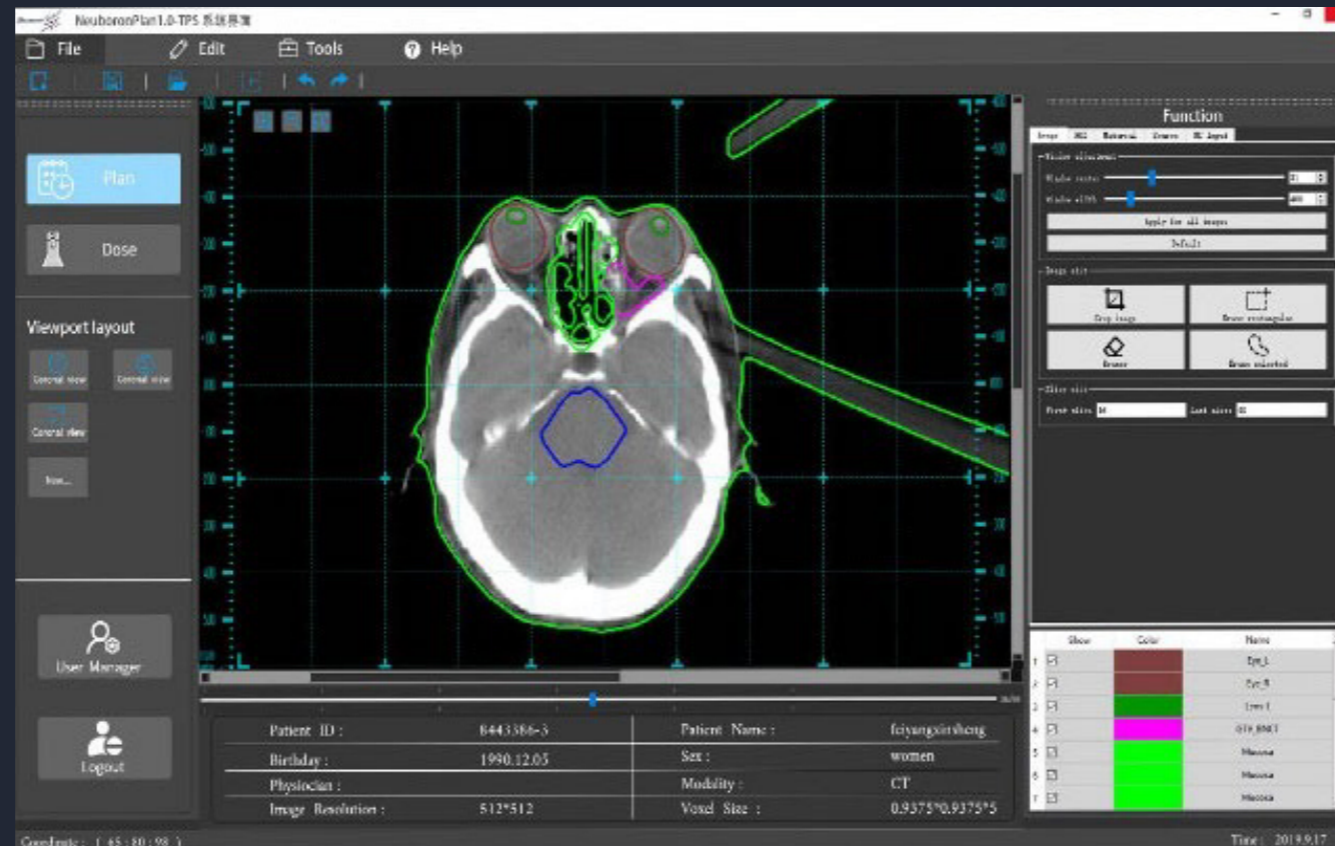

CT
segmentation
algorithm

The algorithms will be **TRAINED** and **TESTED**
using a **GPU** dedicated facility

Aiming to obtain high sensibility and high specificity
