BOLOGNA

ICHEP 2022

41st International Conference
on High Energy Physics

**Università
degli Studi
di Ferrara**

Dear companies,

we are proud to announce that the physics community of the Istituto Nazionale di Fisica Nucleare (INFN) and of the Universities of Bologna and Ferrara will host the 41st International Conference on High Energy Physics (ICHEP 2022) from the 6th to the 13th of July 2022.

For more than 70 years ICHEP has been the most important event for the scientific community involved in high energy physics (HEP), gathering together typically more than a thousand scientists from all over the world. ICHEP is the conference where the most relevant recent results and future strategies are presented and discussed between experimentalists and theorists in a vital and productive exchange of views and ideas.

As usual for ICHEP, the scientific program will cover a wide range of topics including the latest LHC results, neutrino physics, dark matter, astroparticle physics and cosmology.

The program is structured in plenary talks, parallel sessions, satellite meetings as well as poster sessions to allow young scientists to present their work.

It is a real honour for the Italian scientific community to host this prestigious conference which is held in Italy for the first time in its history.

We look forward to seeing you at ICHEP 2022 in Bologna,

Paolo Giacomelli

(Chair of ICHEP 2022)

Lorenzo Bellagamba

(Chair of ICHEP 2022)

The conference site

The ICHEP Conference will take place at the Volvo Congress Centre situated in one of the most important fairgrounds in Europe. The spaces used for the conference are distributed in two adjacent structures: Palazzo dei Congressi (on two levels) and Ex-GAM (on three levels) which in the past hosted the Bologna Gallery of Modern Art.
