

# Report from PubComm-1

**Andrea Messina** is a new member of the PC, Emanuele ask to be in the PC email list up to the end of April.

**Raphael Nobrega** send draft to the PC for the so called “noise” paper.

Davide Pinci and Fabrizio Petrucci are the internal reviewers, and I hope will finish their work in a week from now.

Following the rules after this first step the draft will be sent to the collaboration for a further review.

About a month ago we received expression of interest for two more papers to be writing, where we are?

- “Lime Paper”
- “Luminescence Paper”

You should have received an email with the indication of the procedure for our participation to ICHEP2022, this is a sort of test of this procedure if, as I hope, it works will be adopted for the most important conferences.

## Report from PubComm-2

**Giovanni Mazzitelli** is writing proceedings for Wien Conferences and asks for an updated Author list.

The updated Author list is here:

<https://github.com/CYGNO-publications/airtable/blob/master/data/authorlist.csv>

And is now included as a link in the PC subpage of our Wiki page:

<https://github.com/CYGNUS-RD/WIKI-documentation/wiki>

It could be useful to improve our Author list with ORCID number a new column will be soon created for this, in principle everyone should be able to include his/her own number and in general any kind of information.
