

# Report from PubComm (New Papers!!!)

Received expression of interest for paper writing.

**Raphael Nobrega**

Directional DBSCAN to detect cosmic tracks

Camera Sensors comparison

“Lime Paper” **Gianluca Cavoto** as C.A.

All these proposal must be  
included soon in our Database

“Luminescence Paper” **Giorgio Dho** as C.A.

Experienced (Davide as C.A) problems in the correct writing of our names in the Cygno Paper.

It could be useful to improve our Author list with ORCID number.

I will soon send to the Collaboration a link of a sharable table with the Author List where upload the ORCID...if you do not have...please create it !

During my talk at GSSI there was a request about Author order in our paper...in particular for PHD students could be useful have a publication with their own name as first.

I must say that INFN strongly discourage this considering the alphabetical order the only possible. Discussion is in progress on this item inside the PC in order to make the best to help our young members.
