Extragalactic sources: phenomenology and open questions

Thursday, 8 September 2022 13:30 (20 minutes)

Active Galactic Nuclei have been historically divided into Radio-Loud and Radio-Quiet. I will discuss the most recent results on the main physical mechanisms acting in these two classes of sources and their contribution to the high energy emission.

Summary

Primary author: PANESSA, Francesca (IAPS/INAF)

Presenter: PANESSA, Francesca (IAPS/INAF)

Session Classification: Extra-Galactic sources
