SPONSOR NVIDIA - E4: Accelerating the Next Wave of Innovation and Discovery

Thursday, 26 May 2022 12:00 (30 minutes)

Accelerated computing is transforming the world of AI and computational science, from the data center to the cloud and to the edge. NVIDIA will provide an in-depth overview of the latest news, innovations, and technologies that will help INFN's communities reap the benefits of AI supercomputing. We'll cover topics of interest to HPC developers, targeting traditional HPC modelling and simulation, quantum computing, HPC+AI, scientific visualization, and high-performance data analytics.

Presenter: PACIUCCI, Gabriele (NVIDIA Solution Architecture and Engineering EMEA)

Session Classification: Tecnologie ICT Hardware e Software
