

# Exclusive & Tagging update

*Salvatore Fazio, Spencer Klein, Daria Sokhan*

## Four abstracts for DIS2022:

- Kong Tu: "Measuring the spatial gluons distribution in nuclei with ATHENA at the EIC"
- Salvatore Fazio: "EpIC: a Monte Carlo generator for exclusive processes"
- Daria Sokhan: "Time-like Compton scattering at ATHENA and the EIC"
- Sylvester Joosten: "J/Psi and Upsilon production at ATHENA and the EIC" (*pending travel approval*)

## First WG meeting of 2022:

Discussion of possible summary publication from the WG studies for the proposal: which studies would be published separately (backward production, possibly TCS), which would be incorporated into a summary publication, who is interested in contributing. *Further discussion at next meeting on Monday.*

Discussion of which studies need to be updated – ongoing.

**Fortnightly meeting schedule: next one on Monday, 21st February, at 11.30am (NY time)**
