Fermi, Pamela, AGILE

Wednesday, 27 April 2011 18:20 (20 minutes)

The last generation of high energy gamma-ray and cosmic-ray space experiments are providing an unprecedented view of the high energy universe allowing continuous progresses in the understanding of astroparticle physics. The main results and future perspectives for Agile, Fermi and Pamela space experiments are presented.

Presenter: GERMANI, Stefano (PG)

Session Classification: Fisica Astroparticellare - I

Track Classification: Fisica Astroparticellare
