

Run Docker / Docker compose

Uso e sviluppo di applicazioni su
INFN Cloud

Emidio Giorgio

Overview

- Run Docker
- Docker compose

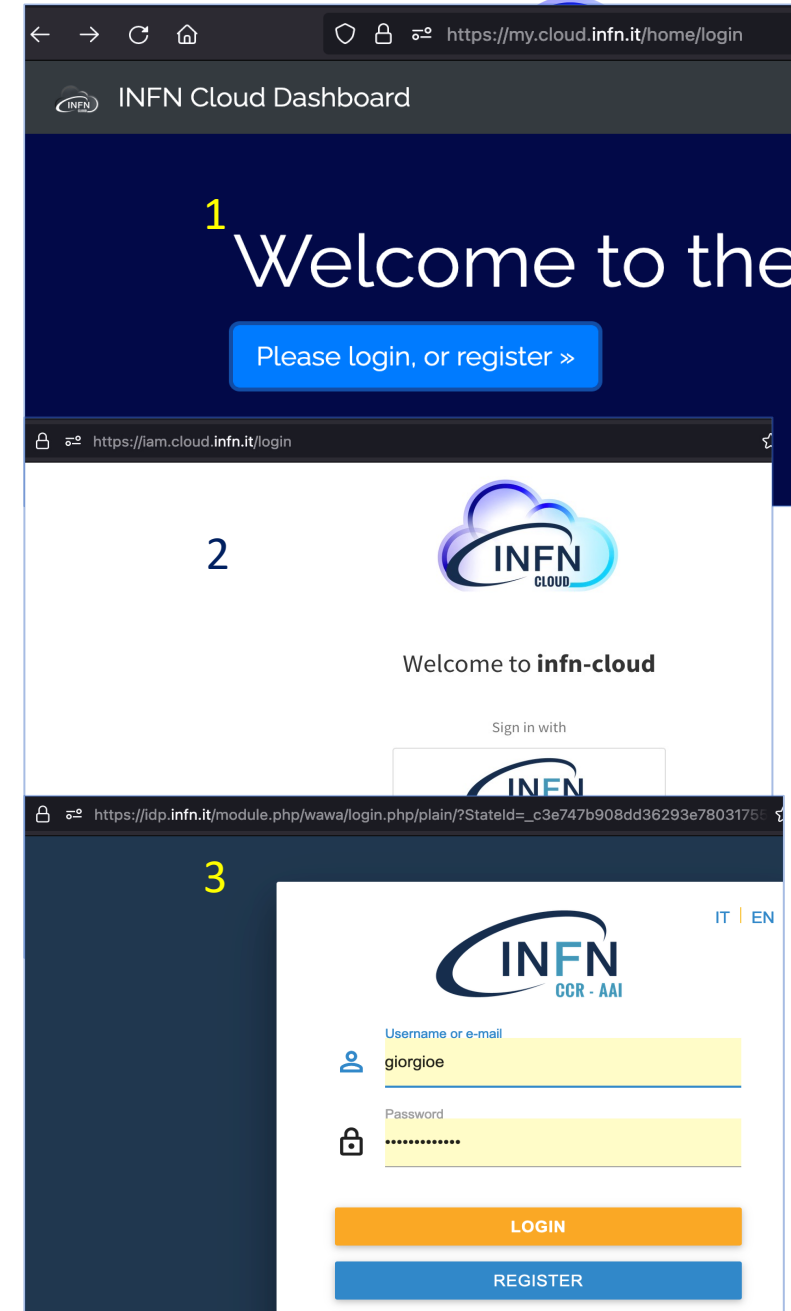

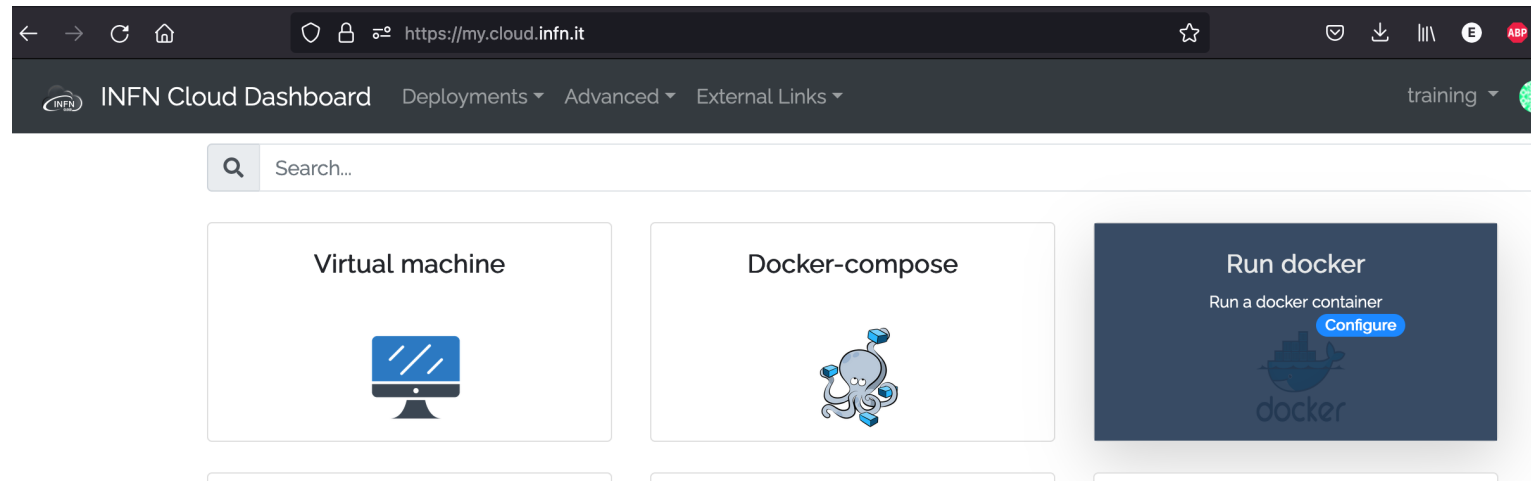

Run Docker

- Istanza un container attraverso la dashboard di INFN Cloud
- L'utente che istanzia è pienamente responsabile del contenuto del container
- Si può scegliere qualunque container da docker hub o dal registry di INFN Cloud
- **Prerequisiti: oltre alla registrazione su IAM/INFN Cloud, è necessaria la nomina di amministratore di sistema**

Deploy di un container /1

- Login to <https://my.cloud.infn.it>
- Seleziona Run Docker

- Video tutorial: https://www.youtube.com/watch?v=MW8_xGzT154

Deploy di un container /2

- Parametri fondamentali
 - **Deployment description**
 - **Docker image** : può essere qualunque cosa pubblicata su docker hub
 - **Ports mapping** (l'apertura delle porte diversa dal default va richiesta esplicitamente, vedi [qui](#))
- **Controllare la documentazione per maggiori dettagli sui parametri e la lista di porte aperte**
- **https://guides.cloud.infn.it/docs/users-guides/en/latest/users_guides/howto8.html**

A screenshot of the INFN Cloud Dashboard interface. The page title is 'INFN Cloud Dashboard' with navigation links for 'Deployments', 'Advanced', and 'External Links'. The main content area is titled 'Description: Run a docker container'. It contains several configuration fields: 'Deployment description' with the value 'clueapp_example_nginx', 'Configuration' set to 'Advanced', 'num_cpus' set to '1', 'mem_size' set to '2', 'docker_appname' set to 'nginx_giorgioe', 'docker_image' set to 'nginx', and 'docker_tag' set to 'latest'. At the bottom, there is a 'ports_mapping' field with the value '8080:80' and a 'Remove' button. Green circles highlight the 'Deployment description', 'docker_appname', and 'ports_mapping' fields.

Tutorial

- Deployment description: `clueapp_rd_wordpress`
- Docker_image: `wordpress`
- Ports_mapping : `80:80`
- Service_ports: Protocol `TCP` Port Range `80`, Source `0.0.0.0/0`

Tutorial /2

Docker compose

- Istanza un insieme di containers
- L'utente è pienamente responsabile del comportamento dei container
- Si può specificare un url (pubblico) da dove scaricare il docker-compose file oppure farne l'upload dopo il deployment
 - Nel compose si possono scegliere qualunque container da docker hub o dal registry di INFN Cloud
- **Prerequisiti: oltre alla registrazione su IAM/INFN Cloud, è necessaria la nomina di amministratore di sistema**

Docker compose/2

The screenshots show the INFN Cloud Dashboard interface. The first screenshot shows a 'Select' dialog with options to 'Configure docker' and 'Configure docker'. The second screenshot shows the 'Docker-compose' configuration page with a description: 'Deploy a virtual machine fetched from the specified URL'. The third screenshot shows the 'Overview' tab of the deployment configuration for 'clueapp_compose', with fields for 'node_ip' (192.135.24.93) and 'ssh_account' (giorgioe). The fourth screenshot shows the 'General' tab of the configuration, including fields for 'ports', 'flavor' (small: 1 VCPUs, 2 GB RAM), 'docker_storage_size' (20), and a checkbox for 'Do you want to run a docker-compose file?' (No).

```
emidio@stoner: ~ $ ssh -i .ssh/id_rsaAnsible giorgioe@192.135.24.93
The authenticity of host '192.135.24.93 (192.135.24.93)' can't be established.
