

SPEAKER: Roberto Franceschini

TITLE: **WIMP in Zugzwang**

DATE: 2 Mar 2022, 15:00

PLACE: 1/1-2 - Aula "C. Voci"

ABSTRACT

In this talk I will review the motivation and the progress on probing dark matter as weakly interacting particle. Combining different probes of dark matter (direct production, direct detection, astrophysical signals) I will discuss to what extent it will be possible to completely rule out some candidate WIMPs in the next future.
