

LiteBIRD(-LNF):
the measurement of the B-mode polarization of the
CMB

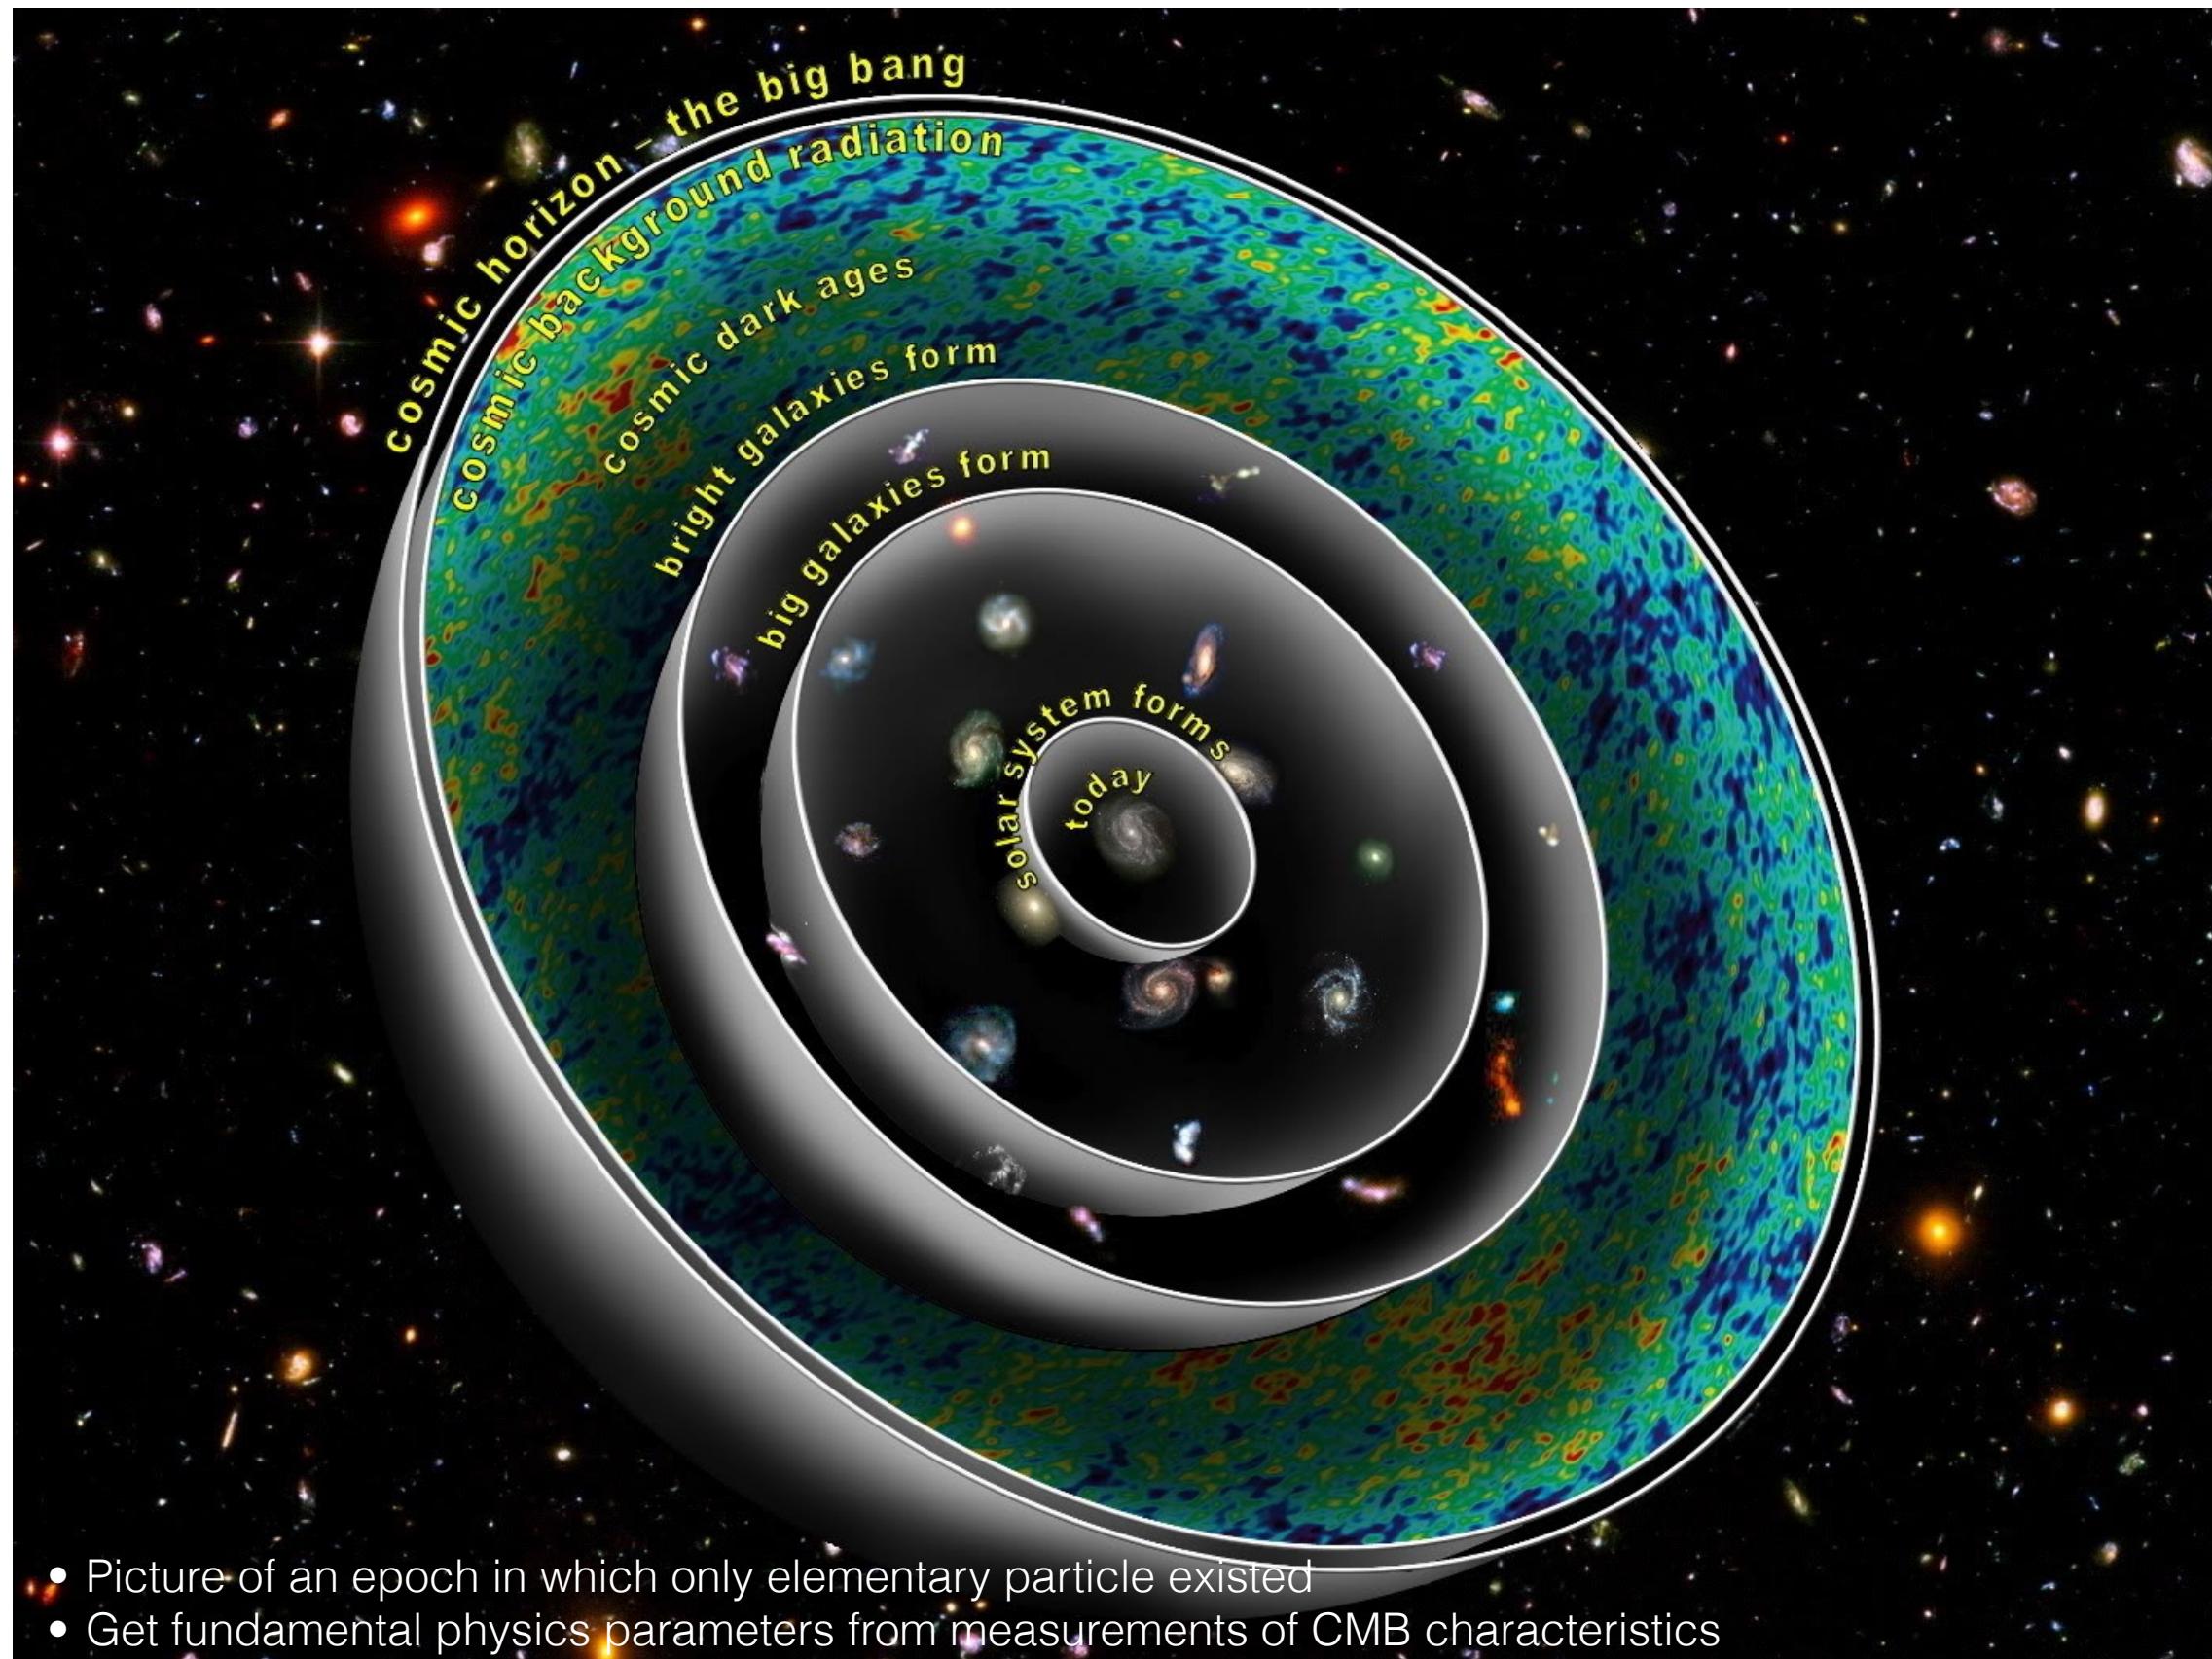

(Luca Porcelli for the Local Participants)

Isotropy... too much!

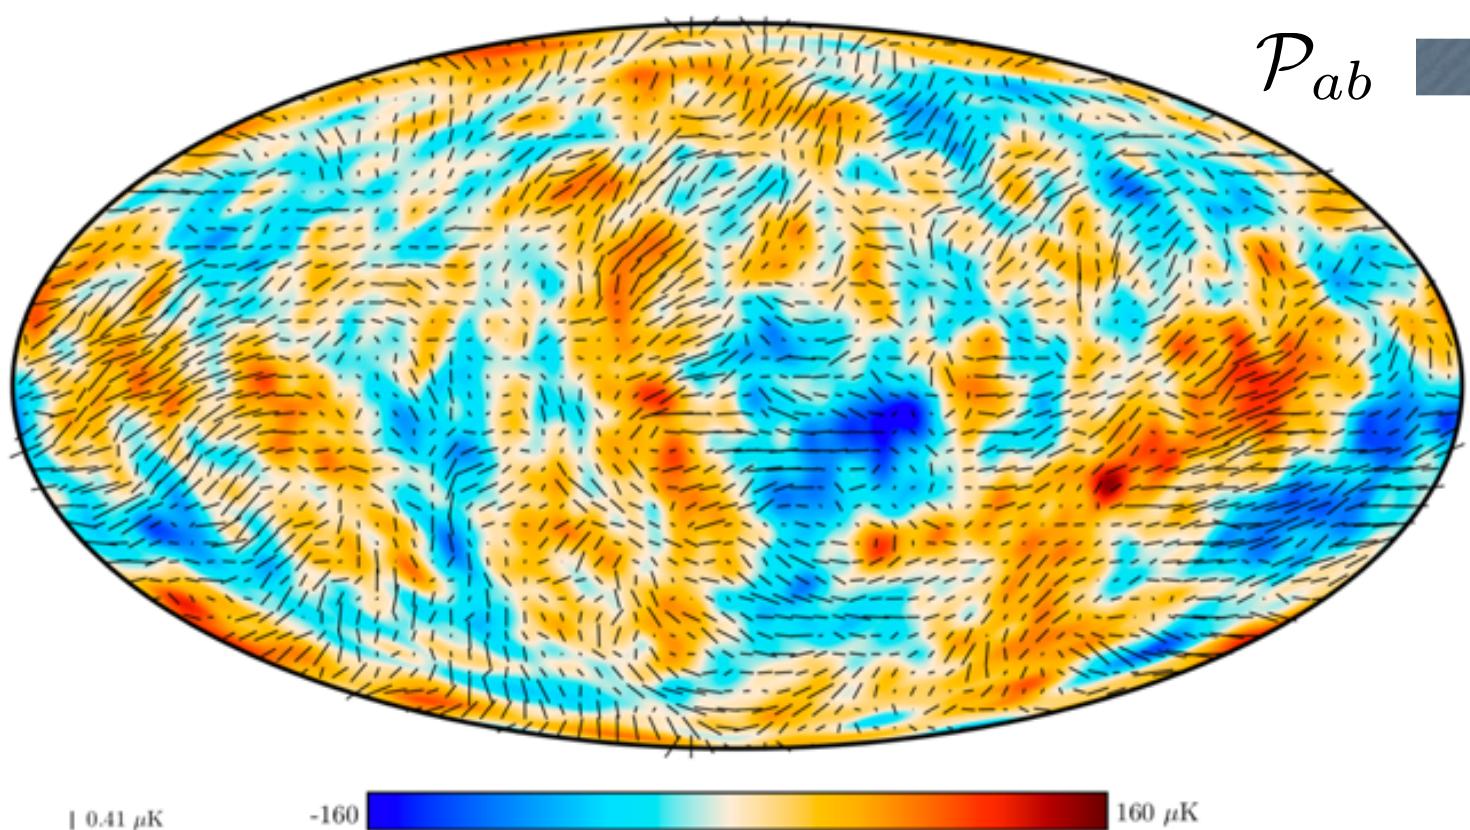

- Same temperature (to 10^{-3}) in regions of the Universe that have **never** been in **causal contact**
- One of the reasons to develop the **cosmological inflation paradigm**
 - **superluminal expansion** of metrics happened between 10^{-36} and 10^{-33} sec. after the Big Bang at $E \sim 10^{16}$ GeV

25

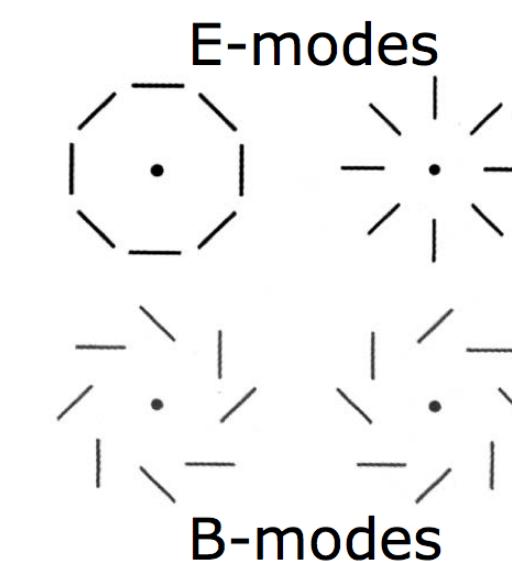

How do we measure polarization?

- Monopole term: 2.725 K blackbody $O(1)$
- Dipole term: 3.355 mK $O(10^{-3})$
- Anisotropy: 100 μK rms $O(10^{-4})$
- Tensor perturbations produce a background of primordial gravitational waves $O(10^{-6\div 7})$
 - E-mode polarization: 3 μK rms
 - B-mode polarization: <500 nK rms

$$\mathcal{P}_{ab} \rightarrow$$

$$E \sim \partial_a \partial_b \mathcal{P}_{ab}$$
$$B \sim \epsilon_{ac} \partial_b \partial_c \mathcal{P}_{bc}$$

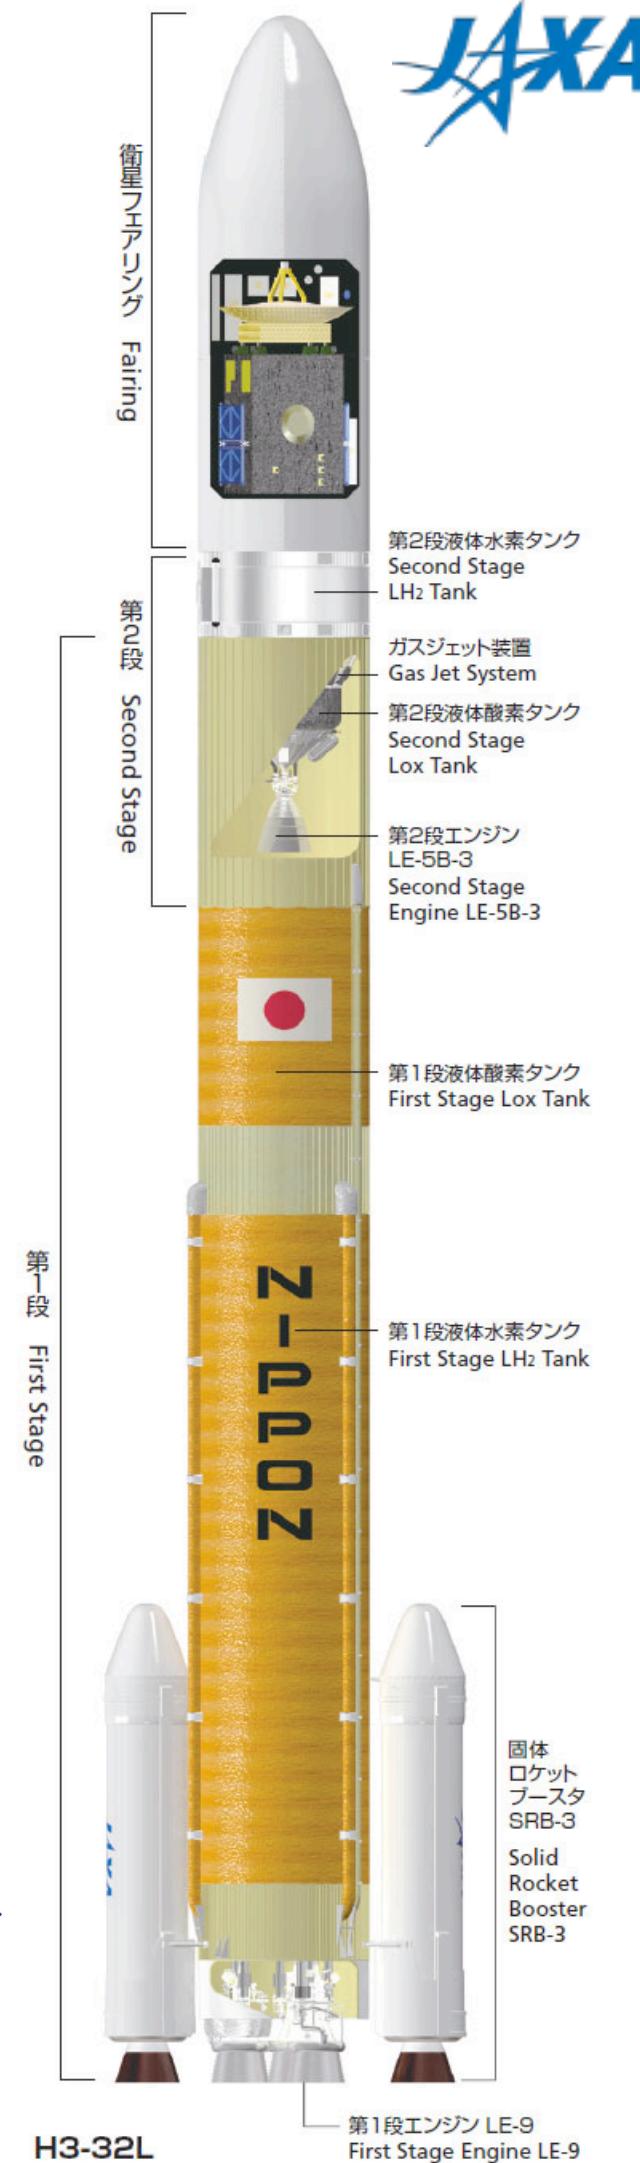

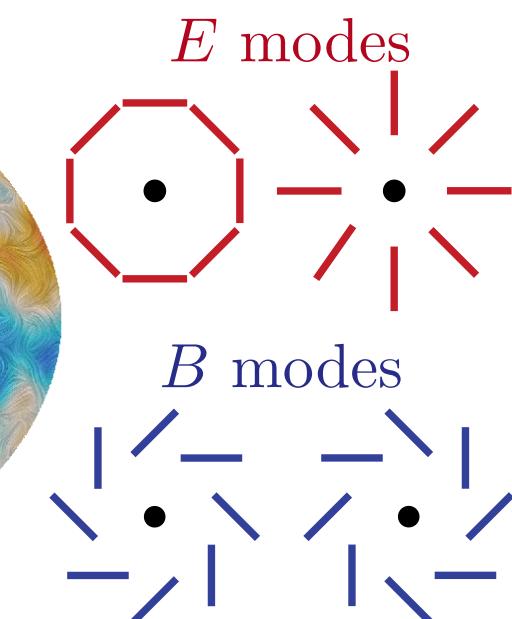

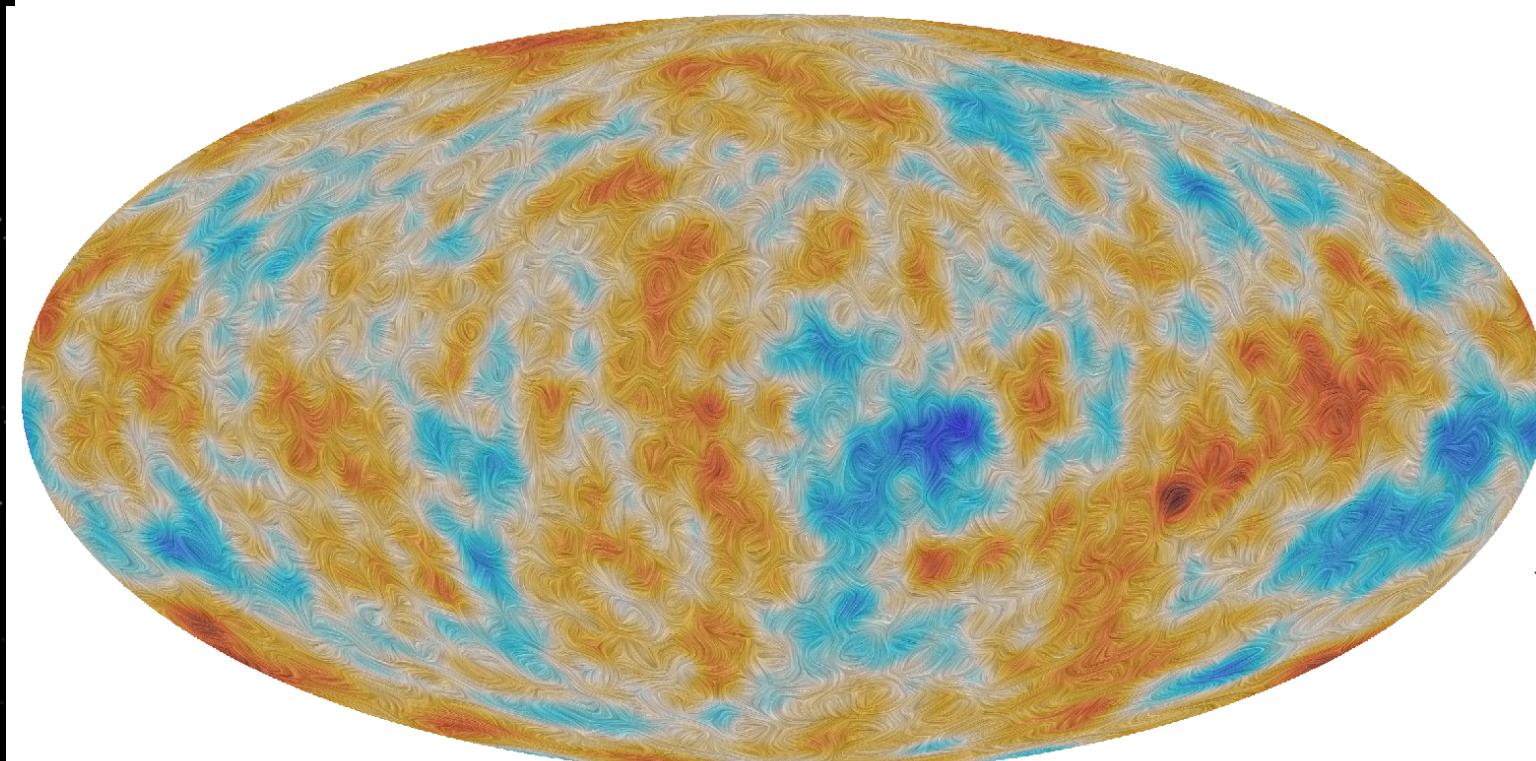

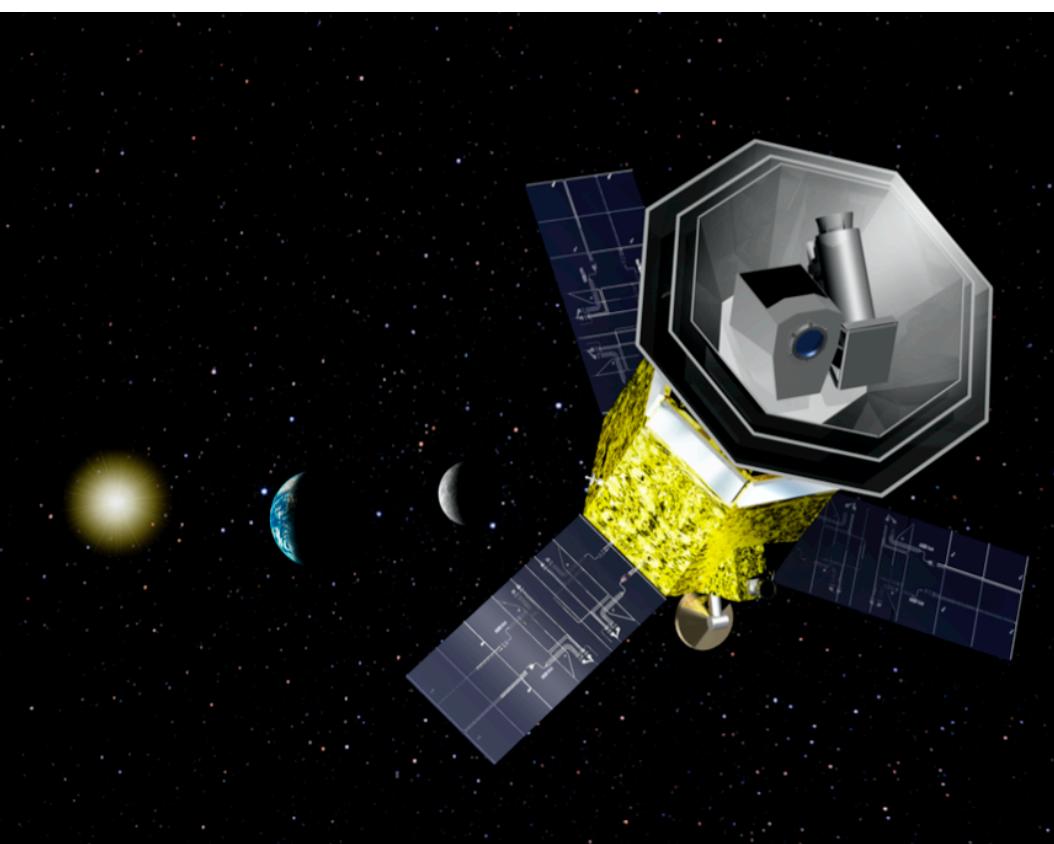

33

LiteBIRD overview

- Lite (Light) satellite for the study of *B*-mode polarization and Inflation from cosmic background Radiation Detection
- JAXA's L-class mission selected in May 2019
- Expected launch in late **2029** with JAXA's H3 rocket
- **All-sky 3-year survey**, from Sun-Earth Lagrangian point L2
- Large frequency coverage (**40–402 GHz**, 15 bands) at **70–18 arcmin** angular resolution for precision measurements of the **CMB *B*-modes**
- Final combined sensitivity: **2.2 $\mu\text{K}\cdot\text{arcmin}$**

Hazumi+ SPIE 2020

LiteBIRD readout system: INFN contributions

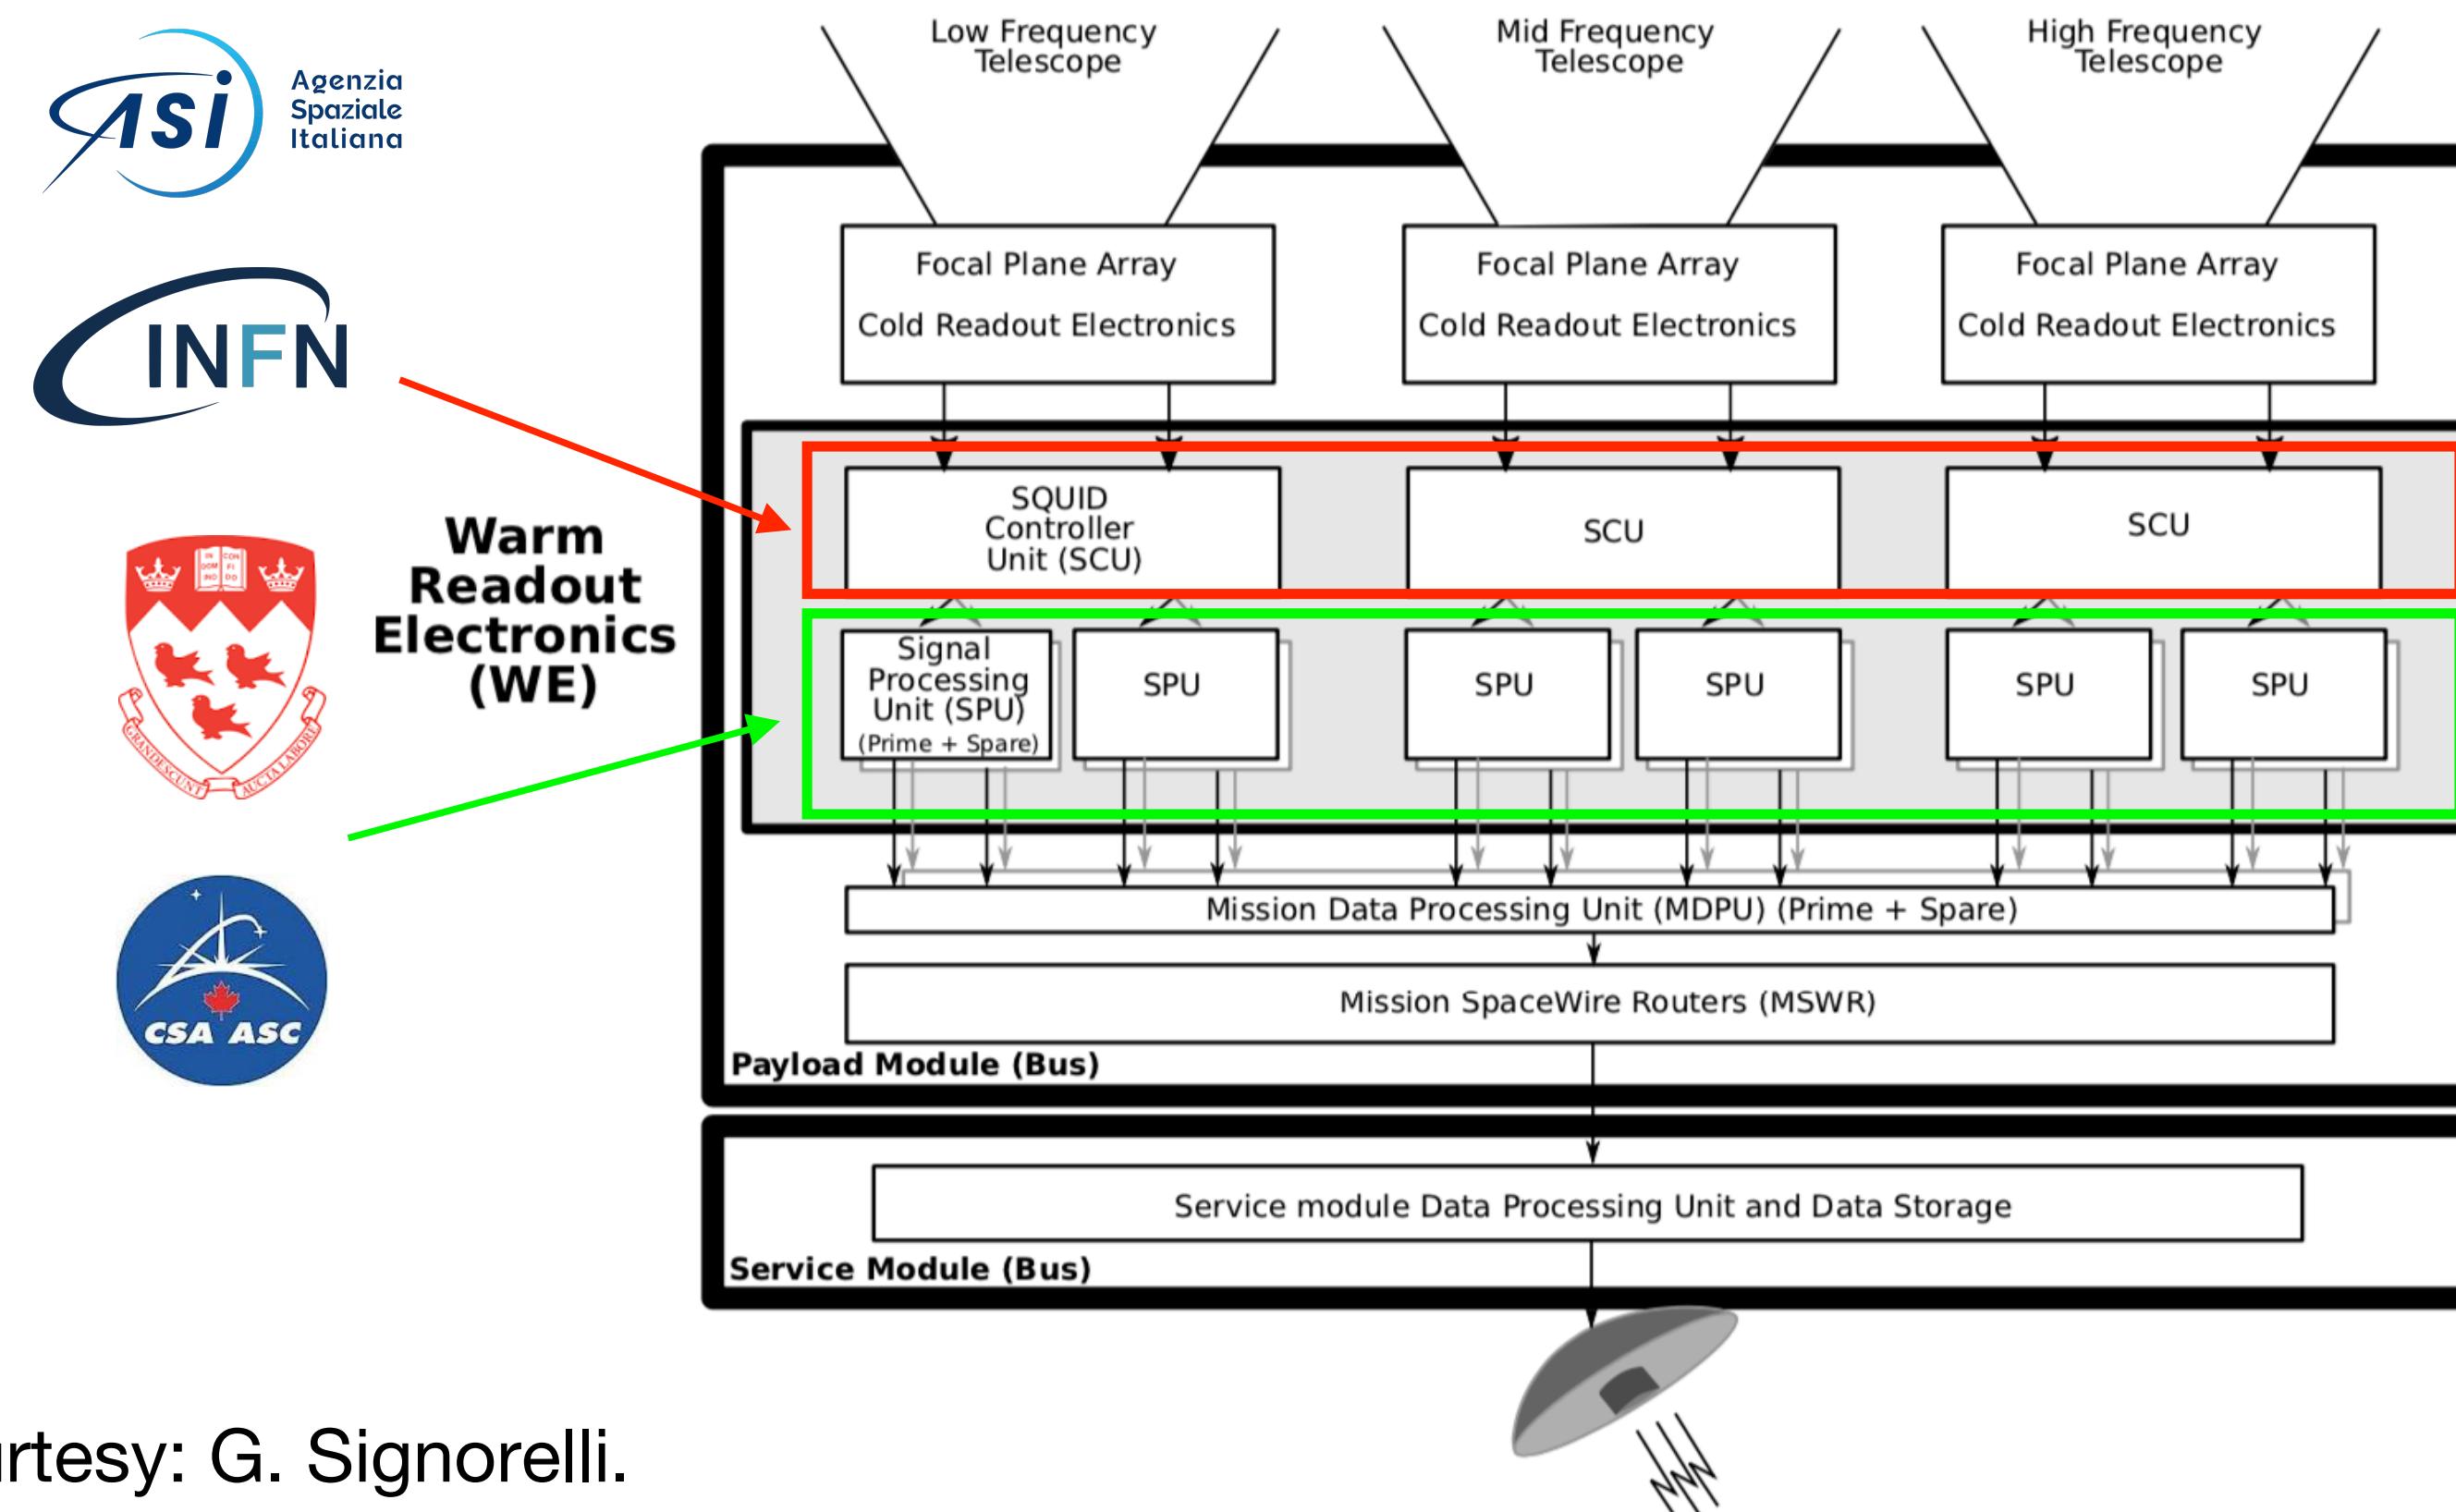

INFN is part of the **ASI-lead** italian contribution

- hardware and software/simulation/analysis
- PI(lead), MIB, FE, MI, TS, RM1, RM2

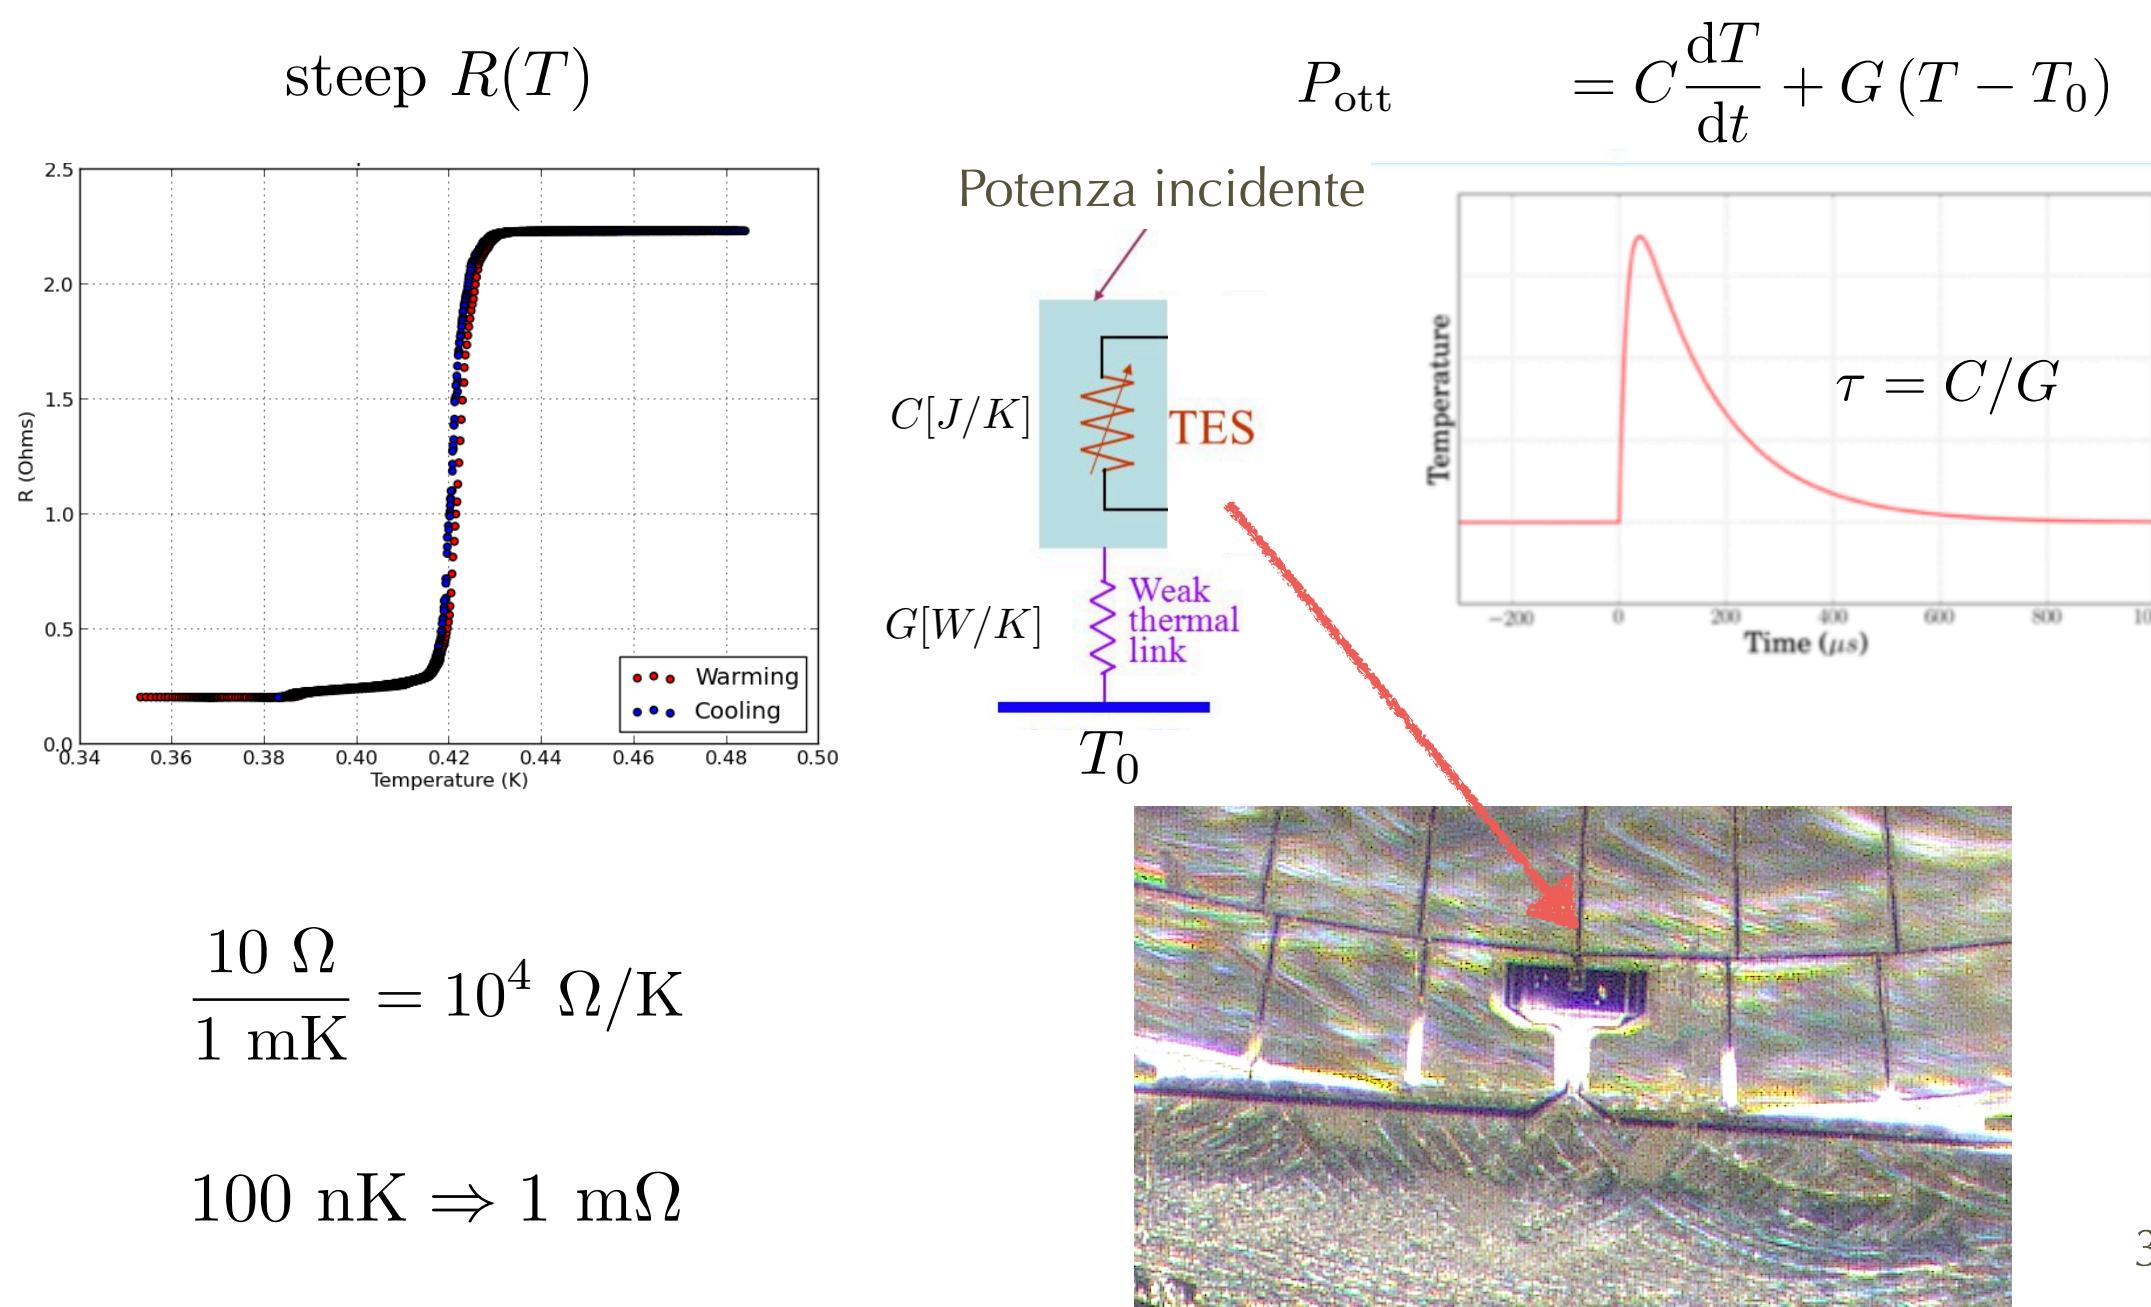

Two main **hardware** contributions:

- **SQUID Controller Unit (SCU)** for 3 telescopes: electronics, thermo-mechanical design, interfaces, shielding
- **Flight qualification** of critical components: in particular, DAC LTC1668 (required, but not qualified yet)

Transition-Edge Sensors

- “Thermometers” that enable us to measure tiny temperature variations
- Superconducting films at their phase transition

37

Proposed Activity @ INFN-LNF

Foreseeable activity as of today:

- (Non)destructive irradiation testing @ X-Lab (Dabagov and Hampai), with extrapolation at longer wavelengths, and X-ray circuitry diagnostics on specifically dedicated and instrumented optical bench.
- Thermal balance test and correlation to models with the software Thermal Desktop (thanks to the ‘pocket’ cryostat belonging to Giovanni Delle Monache, and that will be provided to the effort).
- Involvement in data analysis, modelling and simulations for the physical processes of interest, at ‘cosmological’ level, with Luca Porcelli and if a PhD student of Unical will join the team.
- Involvement in PA/QA of the flight hardware.
- Possibility of hiring PhD students, thanks to the involvement of Sandra Savaglio (Unical).

Proposed Team and FTE Sharing

Team Members as of today:

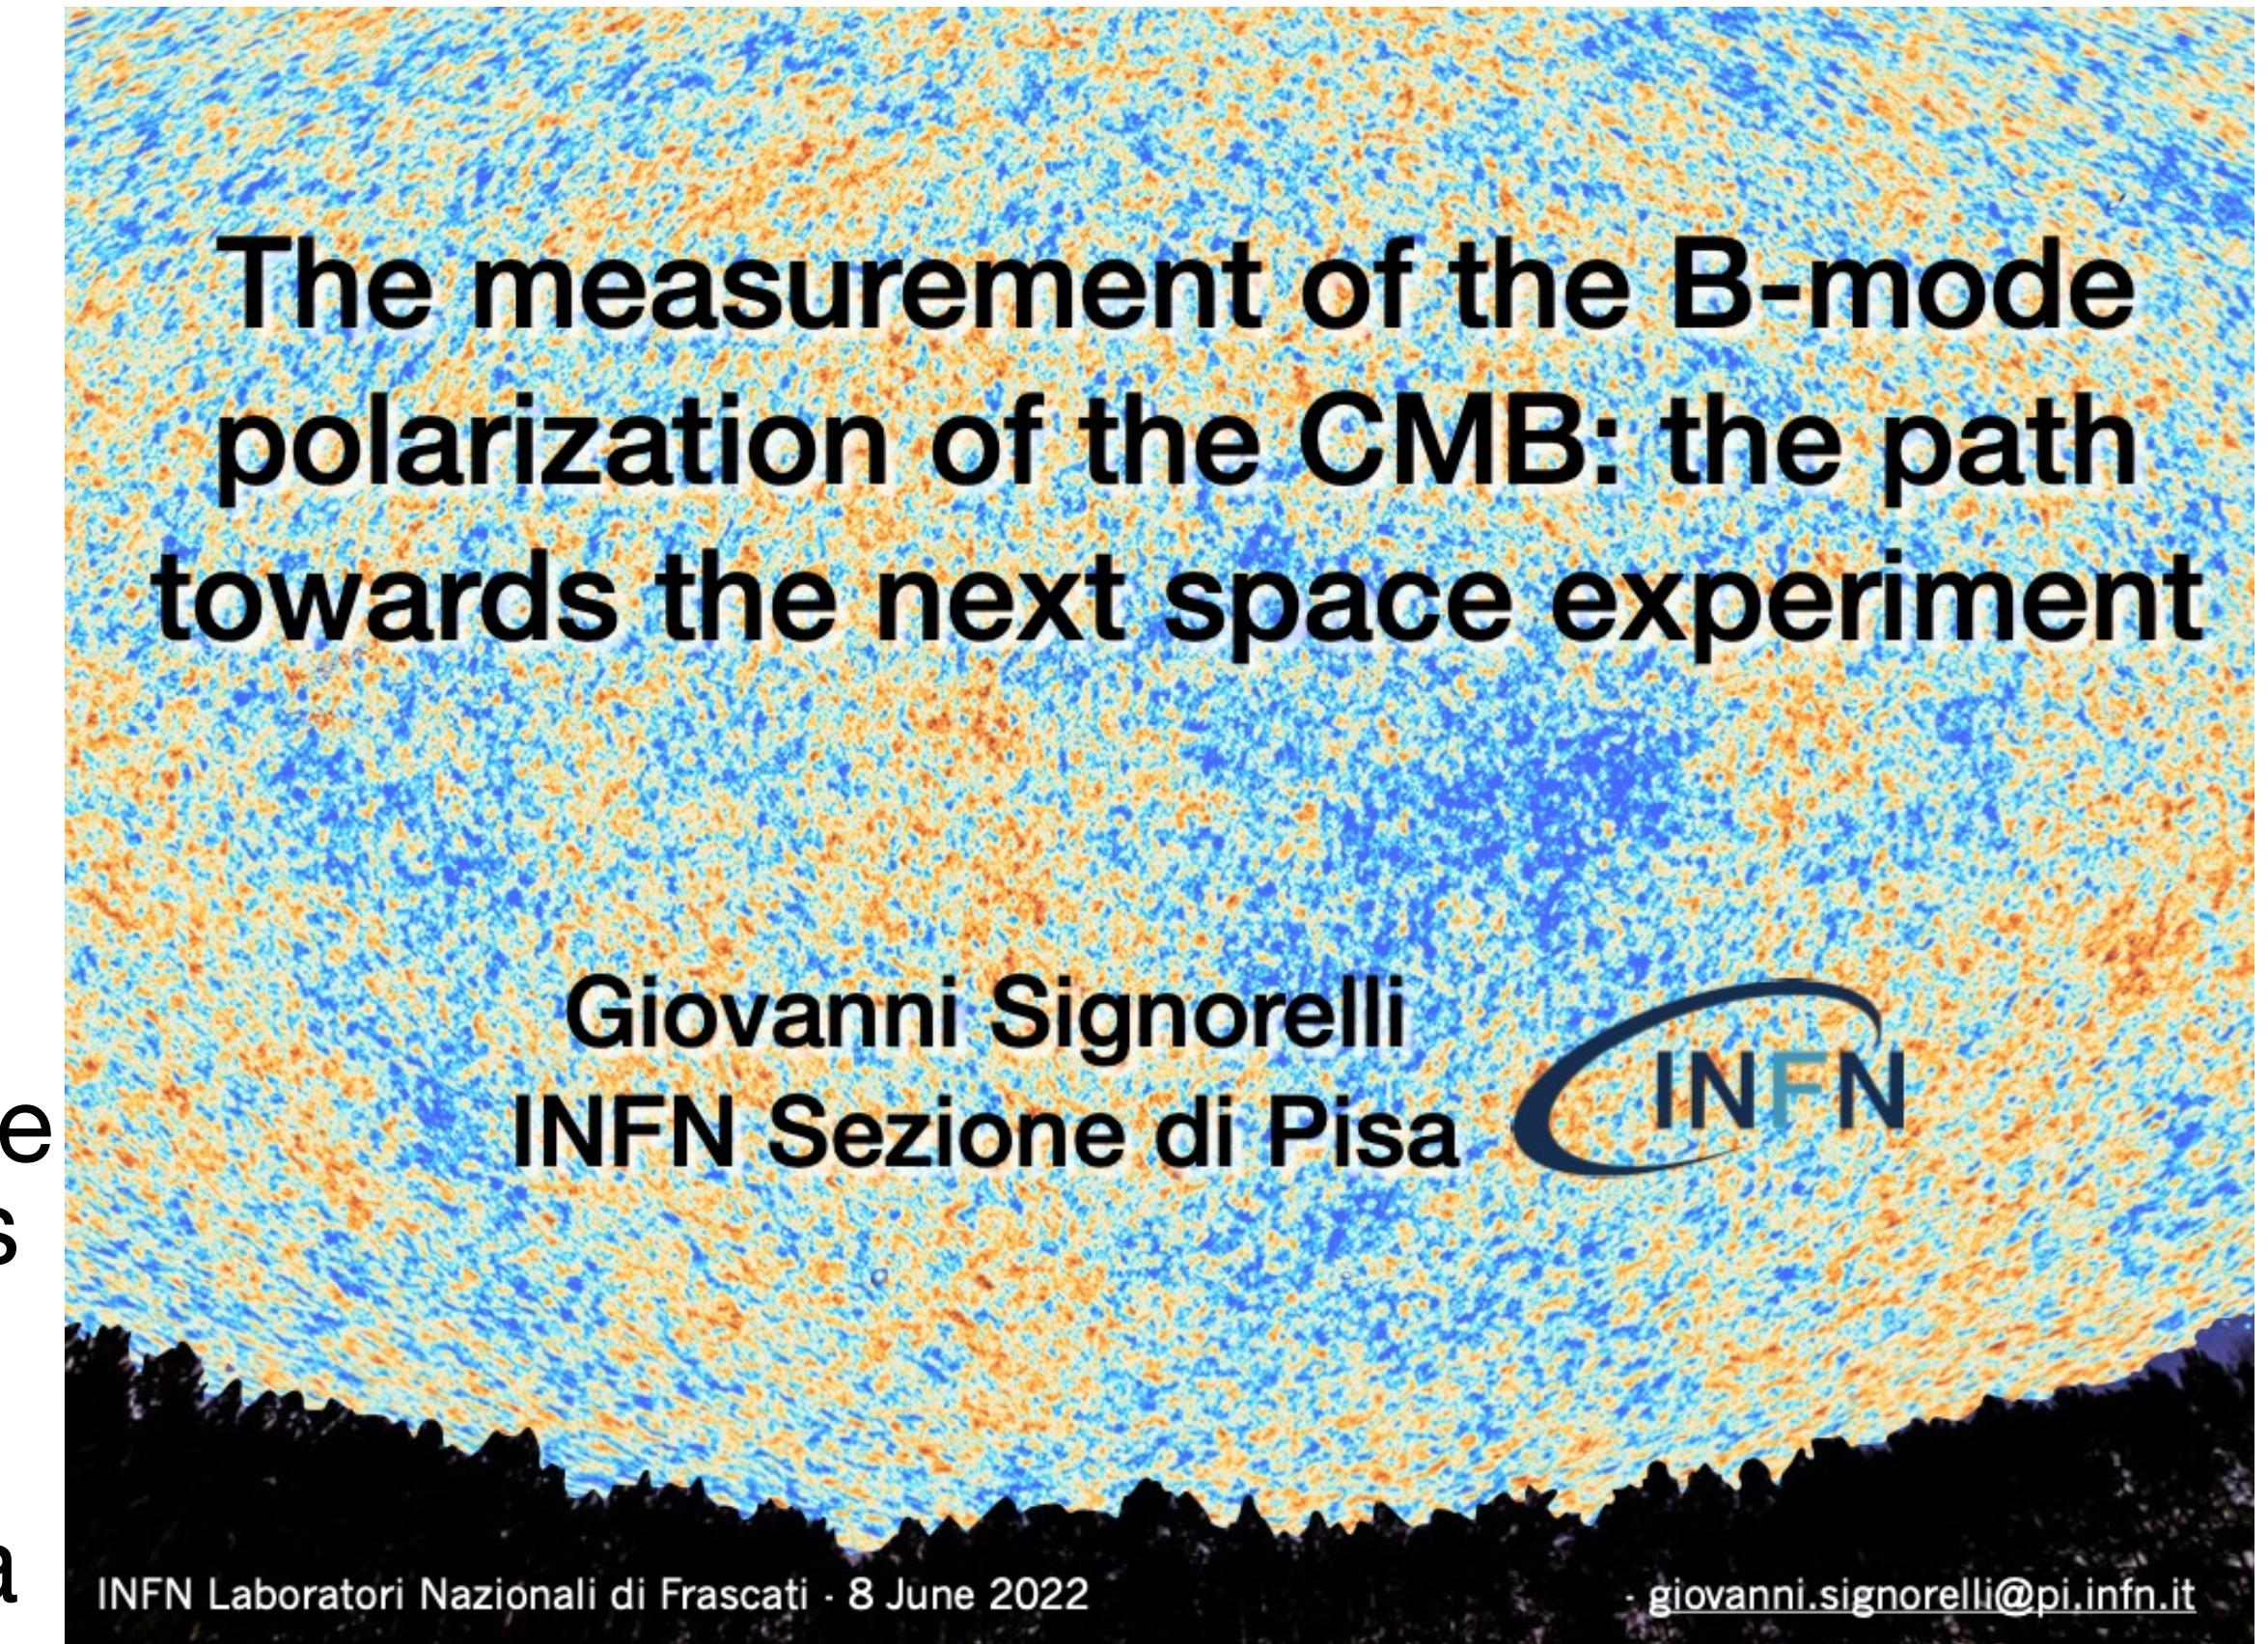

- Luca Porcelli (Staff Researcher - III Level - LR) = 40% FTE.
- Sultan Dabagov (Executive Researcher - I Level) = 40% FTE.
- Dariush Hampai (Staff Technologist - III Level) = 40% FTE.
- Valeria Guglielmotti (Postdoctoral Researcher) = 40% FTE.
- Giovanni Delle Monache (Staff Technologist - III Level) = 30% FTE.
- Sandra Savaglio (Full Professor @ Unical) = 30% FTE.

We are very open to people and ideas, and very welcoming for inclusion of further team members here at INFN-LNF.

LiteBIRD-LNF x 2023

Objective: starting up the local activity and ‘properly’ joining the wider collaboration.

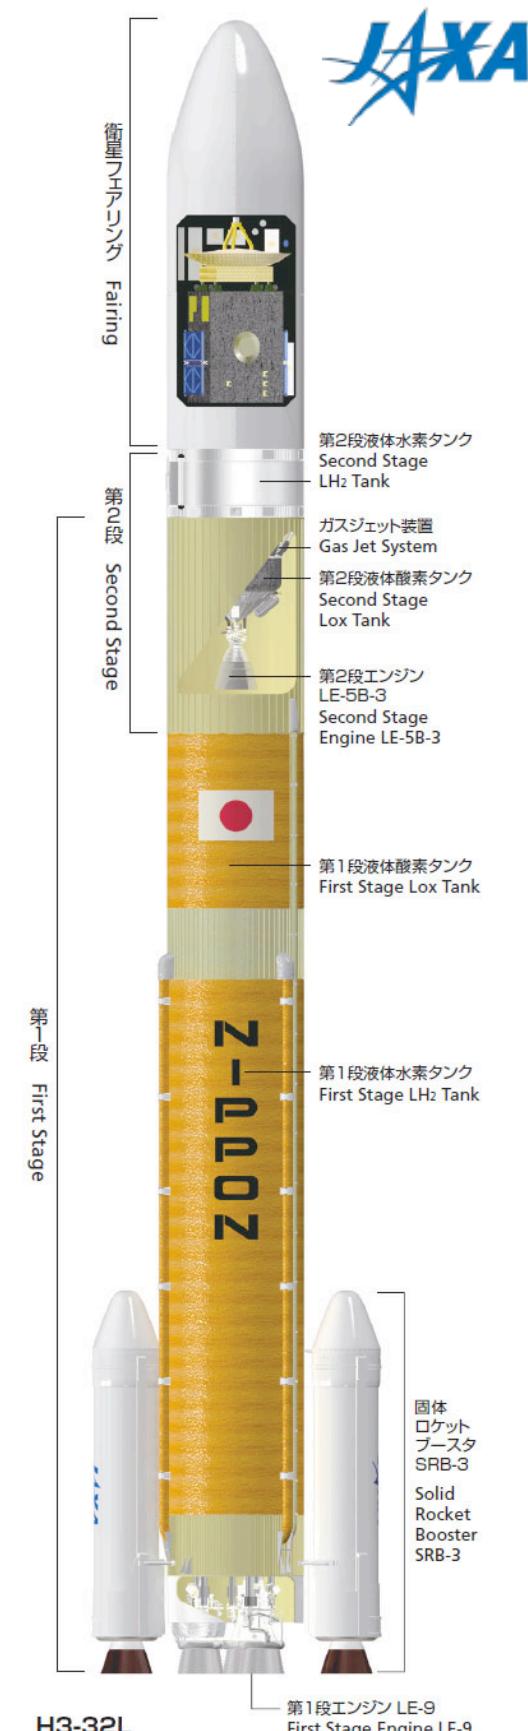

- **2022 Results:**
 - N/A.
- **2023 Objectives:**
 - Starting up the local activity.
 - Joining the wider collaboration.
 - Starting the setup a (non)destructive irradiation testing chain and procedure for the electronics of interest @ X-Lab.
 - Starting the setup and instrumentation of the ‘pocket’ cryostat for tests on the electronics of interest.
 - Starting the teaming with the wider collaboration in order to get involved in data analysis, modelling and simulations for the physical processes of interest, at ‘cosmological’ level.

LiteBIRD-LNF x 2023

Objective: starting up the local activity and ‘properly’ joining the wider collaboration.

- **FTE (LNF):** L. Porcelli (RL, 40%), S. Dabagov (40%), D. Hampai (40%), V. Guglielmotti (40%), G. Delle Monache (30%) + S. Savaglio (Unical, 30%) = 1.9 FTE (2.2 FTE)
- **Richieste CSN2 2023 (overall, TBD):** missioni 10k, consumo 40k, altri cons 5k, inventario 40k, license SW 20k, apparati ...k, servizi ...k
- **Richieste LNF 2023 (mesi-uomo):** Elettronica 0.5; Impianti Fluido 0.5; Criogenia 0.5
- **Fondi Esterni:** N/A
